Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites:

Vsebina:

Študent izvaja klinično delo v učnih bazah MF UM.

Študent dela pod tutorstvom zdravnika v učni bazi MF UM. Opravlja anamnezo in ustrezen pregled bolnika (status) glede na izbrano učno bazo. Sodeluje pri načrtovanju diagnostičnih preiskav, analizi izvidov in pri odločanju o zdravljenju v posamezni učni bazi. Študent aktivno sodeluje pri delu diplomiranih medicinskih sester (odvzem krvi, dajanje injekcij). Po potrebi spremlja bolnika na predvidene preiskave v okviru učne baze.

Mentor zdravnik s svojim podpisom zagotavlja, da je študent opravil vse predvidene obveznosti v učni bazi.

Content (Syllabus outline):

A student carries out clinical practice in educational bases of the MF UM

A student works under tutorial supervision of a physician in the educational base of the MF UM. A student makes an anamnesis and appropriate check-up of a patient (status) according to a chosen educational base. A student cooperates in the planning of diagnostic tests, analysis of results and in decision-making about treatment in an individual educational base.

A student cooperates actively in the work of registered nurses (taking of blood, giving injections). If necessary, a student accompanies a patient to foreseen tests within an educational base.

A mentor physician with his or her signature ensures that a student completed all foreseen obligations in an educational base.

Temeljni literatura in viri / Textbooks:

So identični tistim pri rednih predmetih dodiplomskega študija, po posameznih strokah.

Are identical to those in regular subjects of undergraduate study, according to individual disciplines.

Cilji:

Objectives:

Cilji predmeta so priprava študentov na samostojno delo v okviru določene stroke, ki se izvaja v učnih bazah MF UM.

Študentosvoji pristop k bolniku, obladodnos z njim in svojci, obvladaanamnezo, pregled bolnika, zna ovrednotiti diagnostične metode in predlagati ustrezno zdravljenje. Zna se ustrezno sporazumevati z bolniki in svojciZna voditi zdravstveno dokumentacijo. Obvlada delo v timu. Študent je usposobljen obravnavati bolnika skladno z načeli medicinske etike in deontologije.

Predvideni študijski rezultati:

Študent mora obvladati anamnezo, osnovno klinično preiskavo ustrezne stroke, določiti splošni klinični status, specialni klinični status, diagnostične in terapevtske metode (glej klinična znanja in metode).

Študent mora poznati diagnostične metode izbrane stroke. Naučiti se mora obravnavati in reševati probleme v realnem okolju izbrane stroke.

Metode poučevanja in učenja:

Praktično klinično delo

Naloge študenta: Skrbi za bolnike v okviru učne baze MF UM.

Študent ob sprejemu napravi anamnezo in klinični pregled, predvidi potrebne preiskave in zdravljenje v okviru izbrane stroke. V okviru kirurških strok skladno z navodili mentorja sodeluje tudi pri operativnem programu.

Študent se lahko pridruži svojemu mentorju tudi pri drugih opravilih (npr. v ambulanti).

V okviru ambulantne družinske medicine študent sodeluje pri obravnavi bolnikov v ambulanti, po telefonu ali na domu (hišni obisk). To vključuje jemanje anamneze, usmerjen klinični pregled, odrejanje preiskav, napotitev in terapije. Študent zapisuje izsledke v zdravstveni karton pacienta. Sodeluje pri opravilih srednje medicinske sestre diplomirane medicinske sestre in patronažne medicinske sestre.

Načini ocenjevanja:

Delež (v %) /
Weight (in %)

Assessment:

The objective of a subject is a preparation of students for independent work within a certain discipline that is carried out in the educational bases of the MF UM .

A student masters a patient approach, a relationship with a patient and his/her relatives, the anamnesis, know s how to examine a patient, evaluate diagnostic methods and suggest appropriate treatment. A student is able to communicate properly with patients and relatives. A student knows how to keep medical records. A student masters team work. A student isqualified to treat a patient in accordance with the principles of medical ethics and deontology.

Intended learning outcomes:

A student has to master the making of anamnesis, basic clinical test of appropriate discipline, determine a general clinical status, a special clinical status, diagnostic and therapeutic methods (see clinical knowledge and methods).

A student has to be acquainted with diagnostic methods of a chosen discipline. A student has to deal with and solve problems in a real environment of a chosen discipline.

Learning and teaching methods:

Practical clinical work

Student tasks: Takes care of patients within the educational base of the MF UM. .

A student, upon admission, makes an anamnesis and clinical check-up, foresees the necessary tests and treatment within a chosen discipline. Within surgical disciplines in accordance with the instructions of a mentor a student cooperates also in the operative programme.

A student may join his/her mentor also in other tasks (e. g. in an outpatient clinic).

Within the family medicine clinic a student cooperates in the treatment of patients in the clinic, by telephone or at home (home visit). This includes taking a medical history, targeted clinical examination, ordering examinations, referral and therapy. A student records the results in a medical record of a patient. A student cooperates in the tasks of a nurse, registered nurse and home care nurse.

POGOJI ZA PRISTOP K POSAMEZNEMU PREVERJANJU ZNANJA

Opravljenе obveznosti v učni bazi MF UM v obsegu 180 ur

100 %

REQUIREMENTS FOR ACCESS TO INDIVIDUAL KNOWLEDGE CHECKING:

Completed obligations in the educational base of the MF UM in the extent of 180 hours.
