

UČNI NAČRT PREDMETA / COURSE SYLLABUS	
Ime predmeta:	Anatomija s histologijo
Course title:	Anatomy with histology and embryology

Študijski program in stopnja Study programme and cycle	Študijska smer Study option	Letnik Year of study	Semester Semester
Splošna medicina, enovit magistrski študijski program		Prvi	1., 2.
General medicine, Uniform master's degree study program		First	1st, 2nd

Vrsta predmeta (obvezni ali izbirni) /
Course type (compulsory or elective)

obvezni
compulsory

Univerzitetna koda predmeta / University course code:

Predavanja Lectures	Seminar Seminar	Vaje Tutorial			Klinične vaje Clinical training	Druge oblike študija Other forms of study	Samost. delo Individual work	ECTS
90	45						225	16
		AV	LV	RV				
			120					

Nosilec predmeta / Course coordinator:

Prof. dr. Božena Pejčević

Jeziki /Languages:

Predavanja / Lectures:

slovenski/slovene

Vaje / Tutorial:

slovenski/slovene

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites for enrolling in the course or for performing study obligations:

Vsebina (kratek pregled učnega načrta):

Anatomija Vsebina obsega sistematsko in topografsko anatomijo človeškega telesa -Uvod v anatomijo -Prsni koš -Trebuh -Medenica -Zgornji ud -Spodnji ud - Vrat in glava -Centralni živčni sistem

Content (syllabus outline):

Anatomy Content comprises systematic and topographic anatomy of human body -Introduction to anatomy -Thorax -Abdomen -Pelvis -Superior extremity -Inferior extremity -Neck and head -Central nervous system

Histologija Vsebina obsega splošno in specialno histologijo človeškega telesa Splošna histologija -Epителиjska tkiva -Veziva -Mišičnina -Živčno tkivo Specialna histologija -Obtočila -Kri -Imunski sistem in limfni organi -Endokrine žleze -Prebavila -Dihala -Sečila -Moška spolovila -Ženska spolovila -Koža -Periferno in centralno živčevje -Čutila Embriologija Splošna embriologija Gametogeneza Od oploditve do vgnezenja Oblikovanje dvolistnega embrionalnega ščita Oblikovanje trilistnega embrionalnega ščita Plodove membrane in posteljica Specialna embriologija Razvoj srca in obtočil Razvoj živčevja Razvoj prebavil Razvoj dihal Razvoj urogenitalnega sistema Razvoj škrgžnih (branhialnih) organov	Histology Content comprises general and special histology of human body General histology -Epithelia -Connective tissue -Muscular tissue -Nervous tissue Special histology -Vascular system -Blood -Immune system and lymphatic organs -Endocrine glands -Digestive system -Respiratory system -Urinary system -Male genital organs -Female genital organs -Skin -Peripheral and central nervous system -Organs of special senses Embryology General embryology Gametogenesis From ovulation to implantation Development of bilaminar germ disc Development of trilaminar germ disc Fetal membranes and placenta Special embryology Development of cardiovascular system Development of nervous system Development of digestive system Development of respiratory system Development of urogenital system Development of pharyngeal organs

Cilji in kompetence:

Zagotoviti študentu znanje anatomije, histologije in embriologije, ki je potrebno za razumevanje poznejših predkliničnih in kliničnih predmetov.

Objectives and competences:

Provide a student with knowledge of anatomy, histology and embryology that is necessary for understanding of other preclinical and clinical subjects.

Predvideni študijski rezultati:

Znanje in razumevanje:

Študent mora poznati razmere na trupu in anatomskih modelih ob upoštevanju vseh vidikov anatomije na živem; temeljno je poznavanje anatomije pri odraslem človeku. V nekaterih primerih je potrebno poznati tudi specifično anatomijo različnih starostnih obdobjev ter možne pogostejše variante, kar je pomembno za razumevanje klinične medicine. Znanje histologije – mikroskopske zgradbe človekovega organizma, s posebnim poudarkom na funkciji posameznih celic, tkiv in organov (histofiziologija) in spoznanje posameznih stopenj v embrionalnem razvoju je enako pomembno za nadaljnji študij.

Prenesljive/ključne spretnosti in drugi atributi:

Temeljno medicinsko znanje o zgradbi in delovanju ter razvoju zdravega človeškega telesa omogoča študentu, da tekom nadaljnega študija to znanje uporabi za razumevanje bolezenskih sprememb in razvojnih anomalij.

Intended learning outcomes:

Knowledge and understanding: A student has to recognize the relations on cadavers and anatomical models in consideration of all the aspects of anatomy in living human. Knowing of anatomy of adult human body is basic, although in some instances it is necessary to recognize anatomical variations of different periods of human age, which is important for understanding of clinical medicine. The knowing of histology – the microscopic structure of human organism, with an emphasise on the function of certain cells, tissues and organs (histophysiology) and the knowledge of certain stages in embryonal development is also important for further studies.

Transferable/Key Skills and other attributes:

The basic medical knowledge about the structure, function and the development of the healthy human body, enables a student to apply it in recognition and comprehension of pathological changes and developmental anomalies in the course of his further studies.

Metode poučevanja in učenja:**Learning and teaching methods:**

predavanja, seminarji, laboratorijske vaje	lectures, seminars, laboratory work

Delež (v %) / Share (in %)		Assessment methods:
Načini ocenjevanja:		
Način (pisni izpit, ustno izpraševanje, naloge, projekt): ŠTUDIJSKE OBVEZNOSTI ŠTUDENTOV Opravljene vaje (100%) Opravljene seminarji (100%) POGOJ ZA PRISTOP K IZPITU so opravljeni vsi obvezni kolokviji iz Anatomije (70%): • Thorax (10%) • Abdomen (10%) • Pelvis (10%) • Membrum superius (2,5%) • Membrum inferius (2,5%) • Collum et caput (25%) • Systema nervosum centrale (10%) in Histologije z embriologijo (30 %) Pogoji za prijavo na izpit in pristop k izpitu so opravljeni vsi obvezni kolokviji. Študenti, ki niso opravili vseh obveznih kolokvijev, morajo opraviti predizpitni kolokvij. Predizpitni kolokvij sestoji iz vseh manjkajočih kolokvijev in ga opravljajo študenti pred izpitom. Pogoj za pristop k predizpitnemu kolokviju je prijava na izpit. IZPIT pisni izpit 50% ustni izpit 50% Izpit je sestavljen iz dveh delov: Izpit je sestavljen iz dveh delov: 1) pisni del - študent mora točno in pravilno napisati odgovore na zastavljena vprašanja iz anatomije človeškega telesa in pri tem upoštevati veljavno anatomska nomenklatura 2) ustni del - študent mora točno odgovoriti na vprašanja iz anatomije človeškega telesa.	Anatomija s histologijo in embriologijo (100 %) od tega 50 % 50 %	Method (written or oral exam, coursework, project): ACADEMIC OBLIGATIONS OF STUDENTS: Completed practical work (100%) Completed seminars (100%) REQUIREMENTS FOR ACCESS TO INDIVIDUAL KNOWLEDGE CHECKING: are completed all the obligatory colloquia Anatomy (70%): • The thorax (10%) • The abdomen (10%) • The pelvis (10%) • The superior extremity (2,5%) • The inferior extremity (2,5%) • The neck and head (25%) • The central nervous system (10%) And Histology with embryology (30%) Conditions for sign-up and approach to the examination are completed all the obligatory colloquia. The students who did not complete all the obligatory colloquia must pass the preexamination colloquium. The preexamination colloquium consists of all the missing colloquia and it must be completed before the examination. The condition for approaching the preexamination colloquium is the sign-up to the examination. THE EXAMINATION written examination 50% oral examination 50% The exam consists of two parts: 1) the written part - the student must answer correctly the questions and name correctly the anatomical terms according to the latin anatomic nomenclature 2) the oral part - the student must answer correctly the questions from the anatomy of the human body.

Pogoj za pristop k ustnemu delu izpita je opravljen pisni del. Razmerje 50% :50% velja samo v primeru obeh pozitivnih ocen.		Condition to access the oral exam is completed written exam. Ratio 50%:50% may be considered only in case of both positive marks.
