

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Ime predmeta:	Anatomija s histologijo in embriologijo
Course title:	Anatomy with histology and embryology

Študijski program in stopnja Study programme and cycle	Študijska smer Study option	Letnik Year of study	Semester Semester
Splošna medicina, enovit magistrski študijski program		Prvi	1., 2.
General medicine, Uniform master's degree study program		First	1st, 2nd

Vrsta predmeta (obvezni ali izbirni) / Course type (compulsory or elective)	obvezni compulsory
--	-----------------------

Univerzitetna koda predmeta / University course code:	
--	--

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Clinical training	Druge oblike študija			Samost. delo Individual work	ECTS
				AV	LV	RV		
90	45			120			225	16

Nosilec predmeta / Course coordinator:	Prof. dr. Božena Pejković
---	---------------------------

Jeziki /Languages:	Predavanja / Lectures: slovenski/slovene
	Vaje / Tutorial: slovenski/slovene

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites for enrolling in the course or for performing study obligations:
--	---

Vsebina (kratek pregled učnega načrta):	Content (syllabus outline):
Anatomija Vsebina obsega sistematsko in topografsko anatomijo človeškega telesa -Uvod v anatomijo -Prsni koš -Trebuh -Medenica -Zgornji ud -Spodnji ud - Vrat in glava -Centralni živčni sistem	Anatomy Content comprises systematic and topographic anatomy of human body -Introduction to anatomy -Thorax -Abdomen -Pelvis -Superior extremity -Inferior extremity -Neck and head -Central nervous system

Histologija	Histology
Vsebina obsega splošno in specialno histologijo človeškega telesa	Content comprises general and special histology of human body
Splošna histologija	General histology
-Epitelijska tkiva	-Epithelia
-Veziva	-Connective tissue
-Mišičnina	-Muscular tissue
-Živčno tkivo	-Nervous tissue
Specialna histologija	Special histology
-Obtočila	-Vascular system
-Kri	-Blood
-Imunski sistem in limfni organi	-Immune system and lymphatic organs
-Endokrine žleze	-Endocrine glands
-Prebavila	-Digestive system
-Dihala	-Respiratory system
-Sečila	-Urinary system
-Moška spolovila	-Male genital organs
-Ženska spolovila	-Female genital organs
-Koža	-Skin
-Periferno in centralno živčevje	-Peripheral and central nervous system
-Čutila	-Organs of special senses
Embriologija	Embryology
Splošna embriologija	General embryology
Gametogeneza	Gametogenesis
Od oploditve do vgnezdenja	From ovulation to implantation
Oblikovanje dvolistnega embrionalnega ščita	Development of bilaminar germ disc
Oblikovanje trilistnega embrionalnega ščita	Development of trilaminar germ disc
Plodove membrane in posteljica	Fetal membranes and placenta
Specialna embriologija	Special embryology
Razvoj srca in obtočil	Development of cardiovascular system
Razvoj živčevja	Development of nervous system
Razvoj prebavil	Development of digestive system
Razvoj dihal	Development of respiratory system
Razvoj urogenitalnega sistema	Development of urogenital system
Razvoj škržnih (branhialnih) organov	Development of pharyngeal organs

Cilji in kompetence:

Zagotoviti študentu znanje anatomije, histologije in embriologije, ki je potrebno za razumevanje poznejših predkliničnih in kliničnih predmetov.

Objectives and competences:

Provide a student with knowledge of anatomy, histology and embryology that is necessary for understanding of other preclinical and clinical subjects.

Predvideni študijski rezultati:**Znanje in razumevanje:**

Študent mora poznati razmere na truplu in anatomskih modelih ob upoštevanju vseh vidikov anatomije na živem; temeljno je poznавanje anatomije pri odraslem človeku. V nekaterih primerih je potrebno poznati tudi specifično anatomijo različnih starostnih obdobij ter možne pogostejše variante, kar je pomembno za razumevanje klinične medicine. Znanje histologije – mikroskopske zgradbe človekovega organizma, s posebnim poudarkom na funkciji posameznih celic, tkiv in organov (histofiziologija) in spoznanje posameznih stopenj v embrionalnem razvoju je enako pomembno za nadaljnji študij.

Intended learning outcomes:

Knowledge and understanding: A student has to recognize the relations on cadavers and anatomical models in consideration of all the aspects of anatomy in living human. Knowing of anatomy of adult human body is basic, although in some instances it is necessary to recognize anatomical variations of different periods of human age, which is important for understanding of clinical medicine. The knowing of histology – the microscopic structure of human organism, with an emphasise on the function of certain cells, tissues and organs (histophysiology) and the knowledge of certain stages in embryonal development is also important for further studies.

Prenesljive/ključne spremnosti in drugi atributi: Temeljno medicinsko znanje o zgradbi in delovanju ter razvoju zdravega človeškega telesa omogoča študentu, da tekom nadaljnega študija to znanje uporabi za razumevanje bolezenskih sprememb in razvojnih anomalij.	Transferable/Key Skills and other attributes: The basic medical knowledge about the structure, function and the development of the healthy human body, enables a student to apply it in recognition and comprehension of pathological changes and developmental anomalies in the course of his further studies.

Načini ocenjevanja:	Delež (v %) / Share (in %)	Assessment methods:
<p>Način (pisni izpit, ustno izpraševanje, naloge, projekt):</p> <p>ŠTUDIJSKE OBVEZNOSTI ŠTUDENTOV Opravljene vaje (100%) Opravljeni seminarji (100%)</p> <p>POGOJ ZA PRISTOP K IZPITU so opravljeni vsi obvezni kolokviji iz Anatomije (70%):</p> <ul style="list-style-type: none"> • Thorax (10%) • Abdomen (10%) • Pelvis (10%) • Membrum superius (2,5%) • Membrum inferius (2,5%) • Collum et caput (25%) • Systema nervosum centrale (10%) <p>in Histologije z embriologijo (30 %)</p> <p>Pogoji za prijavo na izpit in pristop k izpitu so opravljeni vsi obvezni kolokviji.</p> <p>Študenti, ki niso opravili vseh obveznih kolokvijev, morajo opraviti predizpitni kolokvij. Predizpitni kolokvij sestoji iz vseh manjkajočih kolokvijev in ga opravljajo študenti pred izpitom. Pogoj za pristop k predizpitnemu kolokviju je prijava na izpit.</p> <p>IZPIT Pisni izpit 50% ustni izpit 50%</p>	<p>Anatomija s histologijo in embriologijo (100 %) od tega</p> <p>50 % 50 %</p>	<p>Method (written or oral exam, coursework, project):</p> <p>ACADEMIC OBLIGATIONS OF STUDENTS: Completed practical work (100%) Completed seminars (100%)</p> <p>REQUIREMENTS FOR ACCESS TO INDIVIDUAL KNOWLEDGE CHECKING:are completed all the obligatory colloquia Anatomy (70%):</p> <ul style="list-style-type: none"> • The thorax (10%) • The abdomen (10%) • The pelvis (10%) • The superior extremity (2,5%) • The inferior extremity (2,5%) • The neck and head (25%) • The central nervous system (10%) <p>And Histology with embryology (30%)</p> <p>Conditions for sign-up and approach to the examination are completed all the obligatory colloquia. The students who did not complete all the obligatory colloquia must pass the preexaminal colloquium. The preexaminal colloquium consists of all the missing colloquia and it must be completed before the examination. The condition for approaching the preexaminal colloquium is the sign-up to the examination.</p> <p>THE EXAMINATION written examination 50% oral examination 50 %</p> <p>The exam consists of two parts:</p>

Izpiti je sestavljen iz dveh delov: 1) pisni del - študent mora točno in pravilno napisati odgovore na zastavljena vprašanja iz anatomije človeškega telesa in pri tem upoštevati veljavno anatomska nomenklaturo 2) ustni del - študent mora točno odgovoriti na vprašanja iz anatomije človeškega telesa. Pogoj za pristop k ustnemu delu izpita je opravljen pisni del. Razmerje 50% : 50% velja samo v primeru obeh pozitivnih ocen.		1)the written part - the student must answer correctly the questions and name correctly the anatomical terms according to the latin anatomic nomenclature 2)the oral part - the student must answer correctly the questions from the anatomy of the human body. Condition to access the oral exam is completed written exam, Ratio 50%: 50% may be considered only in case of both positive marks.
