

UČNI NAČRT PREDMETA / SUBJECT SPECIFICATION

Predmet:	Izbrane vsebine in novosti v biofiziki in medicinski fiziki
Subject Title:	Selected topics and novelties in biophysics and medical physics

Študijski program Study programme	Študijska smer Study field	Letnik Year	Semester Semester
Splošna medicina General Medicine - EMŠP		1	2

Univerzitetna koda predmeta / University subject code:

Predavanja Lectures	Seminar Seminar	Sem. vaje Tutorial	Lab. vaje Labor work	Teren. vaje Field work	Samost. delo Individ. work	ECTS

Vaje / Tutorial:

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites:

Vsebina:

Študent oziroma skupina študentov si po svoji presoji izbere eno temo izmed tukaj navedenih, lahko pa predlaga popolnoma drugo temo iz področij biofizike, biotehnologije, medicinske fizike ipd. in jo predstavi v seminarju ostalim študentom tega izbirnega predmeta. Delo je lahko teoretično ali eksperimentalno.

Kalcij v celičnih procesih in signalizacija med celicami. Biofizični mehanizmi krčenja mišice in kontraktilnih proteinov. Dušikov monoksid in napetostno stanje stene žil. Molekularni motorji. Biofizični mehanizmi izbranih fizioloških procesov oziroma sistemov kot na primer so dihalni sistem, srčnožilni sistem, prenos živčnega signala, vid, sluh. Ionizirajoče sevanje in interakcija s humanim tkivom. Napredne eksperimentalne metode v diagnostiki in terapiji kot na primer CT-rentgen, termografija, upodabljanje z magnetno resonanco, ultrazvok ipd. Medicinska sistemska biologija, kaj je to?

Content (Syllabus outline):

A student or group of students can, at discretion, choose one topic from those mentioned here, however, it is possible to propose a completely different topic from the fields of biophysics, biotechnology, medical physics, etc., and present it in a seminar to other students of this elective course. Work can be theoretical or experimental.

Calcium in cell function and signaling between cells. Biophysical mechanisms of muscle contraction and contractile proteins. Nitric oxide and a stress state of arteries. Molecular motors. Biophysical mechanisms of selected physiological processes and systems such as the respiratory system, the cardiovascular system, the transmission of the nervous signal, vision, hearing and similar. Ionizing radiation and interaction with human tissue. Advanced experimental methods in diagnosis and therapy such as CT-X-ray, thermography, magnetic resonance imaging, ultrasound, etc. Medical systems biology, what is it?

Temeljni literatura in viri / Textbooks:

- Gleb B. Sukhorukov and Helmuth Möhwald: Multifunctional cargo systems for biotechnology. Trends in Biotechnology, 25 (2006) 93-98.
- Irving P. Herman: Physics of the Human Body, 2007, Springer
- Patrick F. Dillon: Biophysics, A Physiological Approach, 2012, Cambridge University Press
- Rob Phillips, Jane Kondev, Julie Theriot: Physical Biology of the Cell, 2009, Garland Science
- Donald T. Haynie: Biological Thermodynamics (Second Edition), 2008, Cambridge University Press.

Cilji: <p>Na osnovi fizikalnih konceptov in zakonitosti ter biofizikalnih mehanizmov osvojiti razumevanje fizioloških procesov v človeškem organizmu ter bioloških procesov na ravneh tkiva, celice ter supramolekularnih in makromolekularnih struktur. Razumeti fizikalne osnove naprednih diagnostičnih in terapevtskih metod medicinske fizike. Doseči vedenje o načinu samostojne obravnave izbrane teme ter njene predstavitev svojim kolegom v seminarju v ustrezni pisni in ustni obliki.</p>	Objectives: <p>To comprehend human physiological processes as well as biological processes running on different levels of biological organisation such as tissues, cells, and supramolecular and macromolecular structures, from the point of view of physical concepts and laws and biophysical mechanisms. To comprehend basic physics of advanced diagnostic methods and therapeutic methods of medical physics. To achieve knowledge on the method of self-treatment of a selected topic and its presentation to their colleagues in a seminar in appropriate oral and written form.</p>

Predvideni študijski rezultati: <p>Znanje in razumevanje: Študentje osvojijo razumevanje različnih procesov v biologiji in fiziologiji na osnovi fizikalnih konceptov in zakonov ter biofizikalnih mehanizmov in modelov. Razumejo osnovne principe delovanja eksperimentalne opreme v diagnostiki in terapiji.</p> <p>Prenesljive/ključne spremnosti in drugi atributi: Študentje znajo uporabiti biofizikalne modele za obravnavo strukture in funkcije izbranih bioloških sistemov in primerov iz humane fiziologije. Znajo samostojno raziskati izbran problem in ga predstaviti v pisni in ustni obliki v seminarju.</p>	Intended learning outcomes: <p>Knowledge and Understanding: Students get understanding of various processes in biology and physiology based on concepts and laws in physics as well as on biophysical mechanisms and models. They understand the basic physical principles of experimental equipment in diagnostics and therapy.</p> <p>Transferable/Key Skills and other attributes: Students are able to use biophysical models for discussing structure and function of selected biological systems and cases in human physiology. They are able to explore the chosen problem and present it in oral and written form in the seminar.</p>
---	---

Metode poučevanja in učenja: <p>Predavanja. Seminar.</p>	Learning and teaching methods: <p>Lectures. Course work.</p>
--	--

Načini ocenjevanja:	Delež (v %) / weight (in %)	Assessment:
Seminar: Seminarska naloga (pisna) Ustna predstavitev seminarske naloge ŠTUDIJSKE OBVEZNOSTI ŠTUDENTOV: Obvezna prisotnost na seminarjih Izdelava pisne seminarske naloge Ustna Ppt predstavitev seminarske naloge POGOJI ZA PRISTOP K POSAMEZNEMU PREVERJANJU ZNANJA: Pravočasno oddana pisna seminarska naloga Pravočasno oddana priprava na ustno predstavitev seminarske naloge	50%	Seminar: Course work (written) Oral presentation of course work ACADEMIC OBLIGATIONS OF STUDENTS: Compulsory participation at seminars Course work written. Oral Ppt presentation of course work REQUIREMENTS FOR ACCESS TO INDIVIDUAL KNOWLEDGE CHECKING: Written seminar work which has to be submitted to the lecturer in time. Arrangements of the oral presentation discussed with the lecturer in time.
