

UČNI NAČRT PREDMETA / COURSE SYLLABUS						
Ime predmeta:	Izbrane vsebine in novosti v nevrologiji					
Course title:	Selected topics and novelties in neurology					
Študijski program in stopnja Study programme and cycle		Študijska smer Study option	Letnik Year of study	Semester Semester		
Splošna medicina, enovit magistrski študijski program General medicine, Uniform master's degree study program			Četrtni, šesti	8., 11.		
			Fourth, sixth	8th, 11th		
Vrsta predmeta (obvezni ali izbirni) / Course type (compulsory or elective)		izbirni elective				
Univerzitetna koda predmeta / University course code:						
Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Clinical training	Druge oblike študija Other forms of study	Samost. delo Individual work	ECTS
5	40	AV LV RV			45	3
Nosilec predmeta / Course coordinator:	prof. dr. Tanja Hojs Fabjan, dr. med.					
Jeziki /Languages:	slovenski/slovene					
	slovenski/slovene					
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites for enrolling in the course or for performing study obligations:					
Vsebina (kratki pregled učnega načrta):						
<p>Študent spozna praktični pristop k nevrološkemu bolniku, nevrološko preiskavo, teoretične osnove, ki pomagajo pri postavljanju diagnoze, anatomska in patološko diagnozo ter posebne preiskovalne metode. Na osnovi naučene nevrološke preiskave in drugih sodobnih metod se uči prepoznavanja najpogostejših nevroloških simptomov in bolezni: možganskožilnih bolezni, njihove dejavnike tveganja, zdravljenje in preprečevanje, znake zvišanega intrakranialnega pritiska – ekspanzivne procese, epilepsijo, demielinizirajoče bolezni osrednjega živčevja, bolezni gibanja (ekstrapiramidne motnje), bolezni motorične ploščice, živčno – mišične bolezni, bolezni hrbtnačne, bolezni perifernih živcev, degenerativne bolezni živčnega sistema, glavobol in različne nevralgije, demenco nevrološkega izvora, infekcije živčevja, poškodbe osrednjega živčevja. Prav tako spoznava nevrološke</p>						
Content (syllabus outline):						
<p>The student becomes aware of the empirical access to a neurological patient, neurological investigation, theoretical basis, which help to form the diagnosis, anatomical and pathological diagnosis and special investigation methods. On the basis of the learned neurological investigation and other modern methods he/she learns to recognize the most common neurological symptoms and diseases: cerebrovascular diseases, their risk factors, therapy and prevention, signs of elevated intracranial pressure – expansive processes, epilepsy, demielinating disease of the central nervous system, movement disorders (extrapyramidal disorders), neuromuscular junction diseases, neuro – muscular diseases, diseases of the spinal cord, diseases of the peripheral nerves, neurodegenerative diseases, headache and different neuralgias, dementia, infections of the nervous system,</p>						

aspekte pri zastrupitvah, boleznih zasvojenosti in različnih psihiatričnih bolezni.

trauma of the central nervous system. He/she recognizes also neurological aspects of poisoning, disorders of abuse and various psychiatric diseases.

Temeljni literatura in viri / Reading materials:

Temeljna literatura

- T. J. Fowler (avtor), John W Scadding, Nick Losseff. Clinical Neurology (2003, 2011)
- Lavrič. Klinična nevrološka preiskava (2007)

Dopolnilna literatura:

- Mathia Baehr, Michael Frtscher. Duus' Topical Diagnosis in Neurology (1997, 2012)
- Geraint Fuller. Neurological Examination Made Easy (2004, 2013)
- Vodušek D. Višja živčna dejavnost, Medicinski Razgledi, 31:369-400, 1992
- M. Janko: Motnje gibanja, 30:55-69, 1991

Cilji in kompetence:

Iz predkliničnih predmetov študent povezuje znanja iz patofiziologije, patologije, anatomije in se uči spoznati motnje v delovanju živčevja. Poleg nevrološke preiskave spozna različne diagnostične metode v nevrologiji, njihove prednosti in omejitve, spozna naravo nevroloških okvar in bolezni, predvsem tistih, ki jih zdravnik splošne prakse najpogosteje srečuje, njihovo zdravljenje in preprečevanje.

Objectives and competences:

The student links knowledge from preclinical subjects pathophysiology, pathology, anatomy and he/she learns how to recognize a disorder in the functions of the nervous system. Besides neurological investigation he/she recognizes various diagnostic methods in neurology, their advantages and disadvantages; he/she recognizes the nature of the neurological disorders and diseases, especially those, a doctor of a general practice meets, their therapy and prevention.

Predvideni študijski rezultati:

Znanje in razumevanje:

Razumevanje patofizioloških mehanizmov najpogostejših nevroloških bolezni in sindromov.

Znanje (vključno o urgenči) nevroloških stanj, ki jih zdravnik splošne medicine najpogosteje srečuje
Prenesljive/klikučne spremnosti in drugi atributi:

Obvladovanje nevrološkega statusa.

Sposobnost aktivnega vključevanja v različne projekte.

Intended learning outcomes:

Knowledge and Understanding:

Understanding the pathophysiology of the most frequent neurological diseases and syndromes.

Knowledge (including of the urgency) of neurological diseases, that a doctor of general practice the most frequently meets.

Transferable/Key Skills and other attributes:

The proficiency of the neurological investigation.

The ability of active participation in different projects

Metode poučevanja in učenja:

Predavanja.
Seminari.

Learning and teaching methods:

Lectures.
Seminars.

Načini ocenjevanja:

Način (pisni izpit, ustno izpraševanje, naloge, projekt)

Izpit: ustni

Delež (v %) /

Share (in %)

100%

Assessment methods:

Type (examination, oral, coursework, project):

Exam (oral)

ŠTUDIJSKE OBVEZNOSTI ŠTUDENTOV: opravljen seminar		ACADEMIC OBLIGATIONS OF STUDENTS:- completed seminar work
POGOJI ZA PRISTOP K POSAMEZNEMU PREVERJANJU ZNANJA: -		REQUIREMENTS FOR ACCESS TO INDIVIDUAL KNOWLEDGE CHECKING: -
