Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites:

Vsebina:

Content (Syllabus outline):

Pri predmetu se bo študent seznanil z anatomsko delitvijo ustne votline, na mehka tkiva, zobe in kosti ter njihovo vlogo pri govoru, žvečenju, prebavi in zaužitju hrane ter fiziognomiji obraza.

Spozna zobno nomenklaturo (poimenovanje zob) in označuje določene zobne površine. Anatomija zob in histologija zobnega organa predstavlja glavni teoretični in praktični del predmeta.

Študent se bo seznanil z morfologijo zob in zobnih lokov mlečne in stalne denticije, prav tako bo seznanjen z morfološki značilnostmi zgornjih in spodnjih sekalcev, podočnikov, ličnikov in kočnikov; orientacijske površine in linije v ustni votlini in obrazu ter odnos med zobmi pri fiziološkem stiku (okluzija, artikulacija).

During class, the student will become familiar with the anatomical division of the oral cavity into soft tissues, teeth and bones, and their role in phonation, mastication, digestion and food ingestion, and facial physiognomy.

It will be introduced with dental nomenclature and marking certain tooth surfaces. Teeth anatomy and dental tissue histology make up the theoretical and practical part of the lesson.

It will become familiar with morphology of teeth and dental arches of deciduous and permanent dentition, will adopt morphological characteristics of upper and lower incisors, canines, premolars and molars; Orientation surfaces and curves in the oral cavity and face, and the relationship between teeth in physiological contact (occlusion, articulation).

**Temeljni literatura in viri / Readings:**

1. Nelson SJ. Wheeler's Dental Anatomy, Physiology, & Occlusion. 11th edition. Elsevier Saunders 2019
2. Fehrenbach MJ, Popowics T. Illustrated Dental Embryology, Histology, and Anatomy. 4th edition. Elsevier Saunders 2015
3. Berkowitz B.K.B., Holland G.R. Moxham BJ. Oral anatomy histology & embriology. Fifth edition. Elsevier 2018

Cilji in kompetence:

Predmet združuje in proučuje anatomske in morfološke podrobnosti vseh zob prve in druge denticije (mlečne in stalne denticije) ter njihove medsebojne odnose in odnose med vsemi anatomskimi strukturami ustne votline ali orofacialnega sistema. Razen morfoloških podrobnosti vključuje tudi fiziološko vlogo zoba, čeljusti in ustne votline kot začetnega dela prebavnega sistema.

Objectives and competences:

The course associates and studies anatomical and morphological details of the teeth in first and second dentition, and their mutual relations and relations of all anatomical structures of the oral cavity, or the oro-facial system. In addition to morphological detail, it includes physiological role of teeth, jaws and mouth as the initial part of the digestive system.

Predvideni študijski rezultati:**Znanje in razumevanje:**

Opisati morfološke značilnosti vseh stalnih zob
 Razlikovati mlečne zobe od stalnih zob
 Oblikovati grizne površine vseh stranskih zob
 Oblikovati labialne površine sekalcev
 Določiti funkcijo stomatognatskega sistema
 Opisati anatomske-morfološke značilnosti zob in čeljusti
 Pojasniti fiziološko funkcijo ustne votline
 Primerjati orientacijske ravnine (transverzalno, sagitalno in vertikalno)
 Opisati anatomske značilnosti nekaterih delov zoba (krona, vrat, endodontski prostor in korenina)
 Opisati in primerjati skupne značilnosti zob v čeljusti
 Primerjati in razlikovati nomenklaturu in sisteme označevanja zob v čeljusti in ustni votlini
 Registrirati ugotovitve
 Razlikovati med topografskimi in anatomskimi značilnostmi zob
 Opisati in analizirati anomalije zob
 Opisati strukturo zobnega tkiva
 Opisati temelje okluzije in artikulacije
 Opisati fizikalne lastnosti in kemično strukturo sklenine

Znanja in spretnosti so podrobneje opisane v Katalogu znanj in spretnosti.

Intended learning outcomes:**Knowledge and understanding:**

Describe the morphological characteristics of permanent teeth
 Distinguish between deciduous and the permanent teeth
 Make the occlusal surfaces of posterior teeth
 Make the labial surfaces of incisors
 Define the function of the stomatognathic system
 Describe the anatomical-morphological characteristics of teeth and jaws
 Describe physiological function of the oral cavity
 Compare transversal, sagittal and vertical planes
 Describe the anatomical features of some parts of the tooth (crown, neck, root canal space and root)
 Describe and compare common characteristics of teeth in jaws
 Compare and distinguish between the nomenclature and systems of marking teeth in the jaw and oral cavity
 Make registration of findings
 Distinguish between topographic and anatomical properties of the teeth
 Describe and analyze the tooth anomalies
 Describe structure of dental tissues
 Describe the types of occlusion and occlusal position
 Describe the physical properties and chemical structure of enamel.
 Knowledge and skills are described in more detail in the Catalogue of Knowledge and Skills.

Metode poučevanja in učenja:

Learning and teaching methods:

Predavanja Seminarji Vaje (tekom vaj bodo študenti pripravili risbe zob in izdelali (iz plastelina, gipsa ali podobnega) zobe zaradi boljšega razumevanja morfoloških oblik zob po funkcionalnih skupinah)	Lectures Seminars Tutorial (during the manual exercises, students will draw and make (from plasticine, gypsum or similar) tooth for better understanding of morphological tooth shape by functional groups)
---	--

Načini ocenievania:

Delež (v %) /
Weight (in %)

Assessment:

Weight (in %)	
Način (pisni izpit, ustno izpraševanje, naloge, projekt)	Type (examination, oral, coursework, project):
Študijsko delo študenta se ocenjuje tekom izvajanja študija in s končnim izpitom.	The study work of the student is assessed during the course of the studies and with final exam.
Vaje 25 %	Exercises 25 %
Prepoznavanje zoba 25 %	Recognition of teeth 25 %
Pisni zaključni izpit 50 %	Final written exam 50 %
Študijske obveznosti študentov:	Academic obligations of students:
Prisotnost študentov na predavanjih (50%) in vajah (80%)	Student attendance at lectures (50 %) and tutorials (80%).
Pogoji za pristop k izpitu:	Requirements for access to individual knowledge checking:
Opravljene vaje (100%)	Completed practical work (100%)
