Cilji in kompetence:

Študent se kot bodoči zobozdravnik seznaniti s specjalističnimi področji zobozdravstva in medsebojnim sodelovanjem ter sodelovanjem zobozdravnika z medicinskimi in nemedicinskimi področji v smislu sodobne diagnostike in zdravljenja.

Objectives and competences:

As a future dentist, the student gets acquainted with the specialist fields of dentistry and cooperation of the dentist with medical and non-medical fields in terms of contemporary diagnostics and treatment.

Predvideni študijski rezultati:**Znanje in razumevanje:**

Kandidat mora po zaključku predavanj, seminarjev in slikovnih prikazov primerov obvladati v programu zastavljene cilje.

Prenosljive/ključne spremnosti in drugi atributi:

Poznavanje področja dela posameznih specjalističnih področij zobozdravstva.
 Interdisciplinarno sodelovanje zobozdravnika za zagotavljanje kvalitetne oskrbe pacienta.

Intended learning outcomes:**Knowledge and understanding:**

After completing the lectures, seminars and visual presentation of cases the candidates has to master the goals set in the program

Transferable/key competences and other abilities:

Knowledge of the field of work of individual specialist areas of dentistry.
 Interdisciplinary cooperation of the dentist to ensure quality patient care.

Metode poučevanja in učenja:

Predavanja
 Seminarji
 Slikovni prikaz primerov

Learning and teaching methods:

Lectures
 Seminars with collaboration of the mentor
 Visual presentation of cases

Načini ocenjevanja:

Delež (v %) /

Share (in %)

Assessment methods:

Ustno izpraševanje
 Seminarska naloga
