Pogoji za vključitev v delo oz. za opravljanje
študijskih obveznosti:

Prerequisites for enrolling in the course or for
performing study obligations:

Vsebina (kratek pregled učnega načrta):

Študenti se v okviru predmeta seznajajo s specialističnimi področji zobozdravstva (pedontologija, zobna in čeljustna ortopedija, zobne bolezni, parodontologija in ustne bolezni, oralna kirurgija, stomatološka protetika), in sodelovanjem splošnega zobozdravnika s specialisti posameznih zobozdravstvenih specialističnih področij pri oskrbi pacienta.

Prav tako se študenti seznajajo z pomembnostjo ustnega zdravja kot dela celostnega zdravja posameznika ter s povezanostjo zobozdravstva z drugimi medicinskimi specialističnimi področji

Content (syllabus outline):

Students are acquainted with specialist areas of dentistry (pedontology, tooth and jaw orthopedics, dental diseases, parodontology and oral diseases, oral surgery, prosthodontics) and the cooperation of a general dentist with dental specialists in treatment of the dental patient.

Students also are acquainted with the importance of oral health as a part of the health of the individuals and thus with the connection of dentistry with other medical specialist fields (radiology, paediatrics, maxillofacial surgery, otorinolaryngology, genetics,)

(radiologija, pediatrija, maksilofacialna kirurgija, otorinolaringologija, genetika,) Spoznati sodobne diagnostične in terapevtske možnosti v zobozdravstvu.	To learn about contemporary diagnostic and therapeutic options in dental medicine.

Cilji in kompetence:

Študent se kot bodoči zobozdravnik seznani s specialističnimi področji zobozdravstva in medsebojnim sodelovanjem ter sodelovanjem zobozdravnika z medicinskimi in nemedicinskimi področji v smislu sodobne diagnostike in zdravljenja.

Objectives and competences:

As a future dentist, the student gets acquainted with the specialist fields of dentistry and cooperation of the dentist with medical and non-medical fields in terms of contemporary diagnostics and treatment.

Predvideni študijski rezultati:

Znanje in razumevanje:

Kandidat mora po zaključku predavanj, seminarjev in slikovnih prikazov primerov obvladati v programu zastavljene cilje.

Prenosljive/ključne spretnosti in drugi atributi:

Poznavanje področja dela posameznih specialističnih področij zobozdravstva.
Interdisciplinarno sodelovanje zobozdravnika za zagotavljanje kvalitetne oskrbe pacienta.

Intended learning outcomes:

Knowledge and understanding:

After completing the lectures, seminars and visual presentation of cases the candidates has to master the goals set in the program

Transferable/key competences and other abilities:

Knowledge of the field of work of individual specialist areas of dentistry.
Interdisciplinary cooperation of the dentist to ensure quality patient care.

Metode poučevanja in učenja:

Predavanja
Seminarji
Slikovni prikaz primerov

Learning and teaching methods:

Lectures
Seminars with collaboration of the mentor
Visual presentation of cases

Načini ocenjevanja:	Delež (v %) / Share (in %)	Assessment methods:
Ustno izpraševanje Seminarska naloga	50% 50%	Oral examination Coursework
