		Slovenski/Slovene

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites:

Vsebina:

Uvod v infekcijske bolezni, klinični in laboratorijski znaki vnetja.
Bakterijske okužbe: stafilokokne, streptokokne, pertusis, tetanus, botulizem, davica, leptosiroze, lymbska borelioza.
Virusne okužbe, ki jih povzročajo: enterični virusi, respiratorni sincicijski virusi, adenovirusi, herpes virusi, varicela-zoster virus, citomegalovirus, Epstein-Barr virus, virus influence in parainfluence, virusi hepatitisa, ošpice, rdečke, exanthema subitum, exanthema infectiosum, AIDS, klamidijske okužbe, rikecioze. Parazitarne bolezni: trihineloza, malarija, tripanosomija. Zoonoze: antraks, brucelozna, lišmanioza, tularemija. Bolezenski sindromi: bakterijski meningitis, serozni meningitis, encefalitis, bakterijske in atipične pljučnice, črevesne okužbe, hemoragične mrzlice, nejasna vročinska stanja, sepsa, izpuščajne bolezni, sindrom utrujenosti.

Tematsko posodabljanje predavanj zahteva dodatek ali razširitev poglavij s spoznanji o vse

Content (Syllabus outline):

Introduction to infectious diseases, clinical and laboratory signs of inflammation.
Bacterial infections: staphylococcal, streptococcal, pertusis, tetanus, botulism, diphtheria, leptospirosis, Lyme boreliosis.
Viral infections cause by enteroviruses, sintitial respiratory viruses, adenoviruses, herpes viruses, varicella-zoster virus, cytomegalovirus, Epstein-Barr virus, influenza and parainfluenza virus, hepatitis, rubeola, rubella, exanthema subitum, exanthema infectiosum, AIDS; chlamidia, rickettsia infections.
Parasitic infestations: triheliosis, malaria, trypanosomiasis. Zoonoses: anthrax, brucelloses, leishmanosis, tularemia. Disease syndroms: bacterial meningitis, serous meningitis, encephalitis, bacterial and atypical pneumoniae, intestinal infections, hemorrhagic fever, unexplained fever conditions, sepsis, cutaneous rash, fatigue syndrome.
{0>}Tematsko posodabljanje predavanj zahteva dodatek ali razširitev poglavij s spoznanji o vse

vse bolj aktualnih infektih (okužbe pri imunsko oslabljenih osebah, transplantirancih, nosilcih umetnih materialov, bolnišnične okužbe, okužbe v tropskih razmerah oz. na potovanjih, bioterizem).

Infektologija za odrasle bolnike

Študent mora spoznati in obvladati diagnostični in terapevtski pristop pri bolniku s sumom na infekcijsko bolezen oziroma pri vročičnem bolniku, spoznati mora značilnosti okužb glede na prizadeti organski sistem (npr. okužb osrednjega živčevja, dihal, prebavil, sečil, spolovil, mišic, kosti in sklepov, kože in podkožja), značilnosti nekaterih bolezni oziroma bolezenskih stanj (npr. virusni hepatitis, AIDS, lymska borelioza, infekcijski endokarditis, sepsa, septični šok, pogosteje tropске bolezni), značilnosti okužb pri bolnikih z ohranjeno ali okvarjeno imunostjo in/ali vgrajenimi umetnimi materiali, ukrepe za preprečevanje nalezljivih bolezni, doktrino racionalne uporabe antibiotikov, protivirusnih, protiglavčnih in protiparazitnih zdravil, kakor tudi pristope za odkrivanje, dokazovanje, zdravljenje in preprečevanje bolnišničnih okužb.

Pediatrična infektologija

Specializant spozna značilnosti in osvoji znanje o etiologiji, epidemiologiji, kliničnih simptomih in znakih, zdravljenju in preprečevanju okužb pri otrocih v različnih starostnih obdobjih. Usposobi se tudi za interpretacijo rezultatov laboratorijskih testov, še posebno tistih, ki se razlikujejo od ugotovitev pri odraslih bolnikih.

Intenzivna in urgentna infektologija

Specializant se seznani s prepoznavanjem, diagnostiko in zdravljenjem akutnih infekcijskih bolezni, ki ogrožajo življenje in ki potrebujejo intenzivno zdravljenje, kakor tudi s preprečevanjem okužb in pravili bolnišnične higiene na oddelku za intenzivno terapijo.

Sklopi naslovnih tem predavanj:

STREPTOKOKNE OKUŽBE:

- streptokokno vnetje žrela (tonsillopharyngitis)
- škrlatinka (scarlatina)
- šen (erysipelas)
- impetigo - pyoderma
- pnevmokokne okužbe
- druge

bolj aktualnih infektih (okužbe pri imunsko oslabljenih osebah, transplantirancih, nosilcih umetnih materialov, bolnišnične okužbe, okužbe v tropskih razmerah oz. na potovanjih, bioterizem).<}{>Updating of lecture themes requires an addition or extension of chapters with new findings on nowadays topical infections (in immune-deficient persons, transplant recipients, recipients of artificial materials, hospital infections, tropic areas- or travel-related infections, bioterrorism).

Infectology in adult patients

Students shall learn and become proficient in the diagnostic and therapeutic approach to patients with suspected infectious disease or febrile condition, learn about infection characteristics with respect to organ system affected (e.g. infections of the central nervous-, respiratory-, gastrointestinal-, urinary system, reproductive organs, muscles, bones and joints, skin and subcutaneous tissues), the characteristics of certain diseases or pathologic conditions (e.g. viral hepatitis, AIDS, Lyme boreliosis, infectious endocarditis, sepsis, septic shock, more frequent tropic diseases), characteristics of infections in patients with preserved or damaged immunity and/or inserted artificial materials, measures for prevention of infectious diseases, doctrine of rational use of antibiotics, antiviral, antifungal and anti-parasitic medications, as well as approaches for the detection, verification, treatment and prevention of hospital infections.

Paediatric infectology

Residents learn and acquire knowledge of etiology, epidemiology, clinical symptoms and signs, treatment and prevention of infection in children in different age periods. They become proficient in the interpretation of the findings of laboratory tests, particularly the ones that differ from those in adult patients.

Intensive and emergency infectology

Residents become acquainted with the identification, diagnosis and treatment of acute life-threatening infectious diseases, which require intensive therapy, as well as with the prevention of infections and rules of hospital hygiene in the unit of intensive therapy.

Sets of lecture title themes:

STREPTOCOCCAL INFECTIONS:

- streptococcal inflammation of the pharynx (tonsillopharyngitis);
- Scarlet fever (scarletina)
- Erysipelas

- STAFILOKOKNE OKUŽBE**
- stafilocokne okužbe kože
 - stafilocokna pljučnica
 - stafilocokni meningitis
 - stafilocokna sepsa
 - stafilocokni endokarditis
 - stafilocokni perikarditis
 - stafilocokni osteomielitis
 - stafilocokkni artritis
 - sindrom toksičnega šoka

OKUŽBE Z ANAEROBI

- tetanus
- botulizem
- druge klostridijske bolezni
- davica

OKUŽBE S HERPES VIRUSI

- s herpes simplex virusom tip 1, 2, 6
- s citomegalovirusom
- z varicela - zoster virusom (varicella, herpes zostere)
- z Epstein Barrovim virusom (mononucleosis infectiosa)

ČREVESNE OKUŽBE:

Salmoneloze

- trebušni tifus
- paratyfus A, B
- akutni enterokolitis

Griža (dysenteria)

Kampilobakterioza

Zastrupitev s hrano - stafilocokna

- Clostridium perfringens
- Bacillus cereus

Jersinioza

Kolera

Virusni enterokolitisi

- rotavirusni
- norwalk virusni
- adenovirusni
- astrovirusni

Driske na potovanjih

Driske pri imunsko motenih bolnikih

Driske povzročene z E. coli

Driske povzročene z aeromonas sp.

Driske povzročene s Clostridium difficile

OKUŽBE OSREDNJEGA ŽIVČEVJA

Gnojni (bakterijski) meningitisi

- meningokokni meningitis
- Pneumokokni meningitis
- Hemofilusni meningitis
- Listerijski meningitis

- Impetigo - pyoderma
- Pneumococcal infections
- Others

STAPHYLOCOCCAL INFECTIONS

- staphylococcal infections of the skin
- staphylococcal pneumonia
- staphylococcal meningitis
- staphylococcal sepsis
- staphylococcal endocarditis
- staphylococcal pericarditis
- staphylococcal osteomyelitis
- staphylococcal arthritis
- toxic shock syndrome

ANAEROBIC INFECTIONS

- tetanus
- botulism
- other clostridial diseases
- diphtheria

HERPES VIRUS INFECTIONS

- with herpes simplex virus types 1, 2 and 6
- with cytomegalovirus
- with varicella, herpes zoster virus
- with Epstein-Barr virus (mononucleosis infectiosa)

INTESTINAL INFECTIONS:

Salmonelloses

- typhoid fever
- paratyphoid fever A, B
- acute enterocolitis

Bloody diarrhea (dysenteria)

Campylobacteriosis

Food poisoning - staphylococcal

- Clostridium perfringens
- Bacillus cereus

Yersiniosis

Cholera

Viral enterocolitis infections

- rotaviral infections
- Norwalk virus infections
- adenoviral
- astroviral

Travel-related diarrheas

Diarrheas in immune-deficient patients

E. coli-caused diarrheas

Aeromonas sp.-caused diarrheas

Clostridium difficile -caused diarrheas

CENTRAL NERVOUS SYSTEM INFECTIONS

Purulent (bacterial) meningitis

- meningococcal meningitis
- pneumococcal meningitis

<ul style="list-style-type: none"> - Stafilocokni meningitis - Gramnegativni bacilarni meningitis <p>Serozni meningitisi, meningoencefalitisi</p> <ul style="list-style-type: none"> - tuberkulozni meningitis - leptospirozni meningitis - borelijski meningitis - brucelozni meningitis - mikoplazmatski meningitis - klopni meningoencefalitis - herpetični (HSV tip 1, 2) meningoencefalitis - enterovirusni meningoencefalitisi - glivični meningoencefalitis - parazitni meningoencefaltitis <p>OKUŽBE DIHAL</p> <p>Tonsilofaringitis</p> <p>Bakterijske pljučnice</p> <p>Atypične pljučnice:</p> <ul style="list-style-type: none"> - klamidijske okužbe - mikoplazemske okužbe - legioneloze - Q mrzlica <p>Oslovski kašelj (pertussis)</p> <p>Influenca</p> <p>Parainfluenca</p> <p>Virusna prehladna obolenja</p> <p>Adenoviroze</p> <p>IZPUŠČAJNE BOLEZNI</p> <p>Ošpice (morbilli)</p> <p>Rdečke (rubella)</p> <p>Erythema infectiosum</p> <p>Exanthema subitum</p> <p>Norice (varicella) - herpes zoster</p> <p>Rikecioze</p> <p>VIRUSNI HEPATITISI - A, B, C, D,E, G, H</p> <p>PARAZITNE BOLEZNI</p> <p>Toksoplazmoza</p> <p>Lamblioza</p> <p>Tenioza - cisticerkoza</p> <p>Ehinokokoza</p> <p>Trihineloza</p> <p>Filarioza</p> <p>Okužbe s pneumocistis carinii</p> <p>ZOONOZE</p> <p>Listerioza</p> <p>Brucelozna</p> <p>Tularemija</p> <p>Lymska borelioza</p> <p>Erlihioza</p> <p>Vranični prisad (antraks)</p> <p>Bolezni mačje opraskanine</p> <p>Steklina (rabies)</p>	<ul style="list-style-type: none"> - Haemophylus influenzae-caused meningitis - listerial meningitis - staphylococcal meningitis - gram-negative bacterial meningitis <p>Serous meningitis, meningoencephalitis</p> <ul style="list-style-type: none"> - tuberculous meningitis - leptospirosis-caused meningitis - Borellia-caused meningitis - brucellosus meningitis - mycoplasma meningitis - tick-borne meningoencephalitis - herpetic (HSV type 1, 2) meningoencephalitis - enteroviral meningoencephalitis - fungal meningoencephalitis - parasitic meningoencephalitis <p>RESPIRATORY INFECTIONS</p> <p>Tonsilopharyngitis</p> <p>Bacterial pneumonias</p> <p>Atypical pneumonias</p> <ul style="list-style-type: none"> - chlamidial infections - mycoplasmic infections - legionelloses - Q fever <p>Whooping cough (pertussis)</p> <p>Influenza</p> <p>Parainfluenza</p> <p>Viral cold-related diseases</p> <p>Adenoviroses</p> <p>RASH DISEASES</p> <p>Measles (morbilli)</p> <p>German measles (rubella)</p> <p>Infectious erythema</p> <p>Exanthema subitum</p> <p>Varicella - herpes zoster</p> <p>Ricketsioses</p> <p>VIRAL HEPATITISES - A, B, C, D,E, G, H</p> <p>PARASITIC DISEASES</p> <p>Toxoplasmosis</p> <p>Lambliosis</p> <p>Teniosis - cysticerkosis</p> <p>Echinococcosis</p> <p>Trichinosis</p> <p>Filariosis</p> <p>Pneumocystic carinii infections</p> <p>ZOONOSES</p> <p>Listeriosis</p> <p>Brucellosis</p> <p>Tularaemia</p> <p>Lyme boreliosis</p> <p>Ehrlichiosis</p> <p>Anthrax</p> <p>Cat-scratch diseases</p>
---	--

pekoča mikcija	hemorrhagic diatesis
rana	presence of mucus and/or blood in stool
polakisurija	insect sting
glavobol	burning sensation on urination
oligurija	wound
trizmus	polakisuria
anurija	headache
bolečine v zatilju	oliguria
bolečine v ledjih	trismus
otrplost tilnika	anuria
motnje zavesti	pain in the nape of the neck
epistaksa	pain in the loins
parestezije	neck stiffness
nahod	consciousness disorders
tremor	epistaxis
strabizem	paresthesias
mišični krči	rhinitis (runny nose)
paralize	tremor
Razen opisov klasičnih infekcijskih bolezni in okužb posameznih organov bomo od študentov zahtevali tudi poznavanje patofiziološkega razumevanja in diferencialno diagnostiko komatoznih stanj, septičnega šoka, ARDS, dehidracije in akutne ledvične odpovedi ter razumevanje pojmov medsebojnih odnosov med makro in mikro organizmom (saprofit - komerzial - parazit - patogen; infekt - infekcijska bolezen; virulenza; rezistenca; imunost).	strabismus
	muscle spasms
	paralysis
	Besides being able to describe classical infectious diseases and individual organ infections, the students will be expected to understand patho-physiology and differential diagnosis of comatous conditions, septic shock, ARDS, dehydration and acute renal failure; they should also be able to explain the terms associated with relationship between macro- and microorganism (saprophyte - commersal - parasite -pathogen; infectant - infectious disease; virulence; resistance; immunity).

Cilji:

Študent pri pouku spoznava epidemiološke, patofiziološke, etiopatogenetske in klinične značilnosti infekcijskih bolezni, lastnosti povročiteljev (patogenost, virulenza, itd.) in gostiteljev (dovzetnost, nagnjenost, itd.) ter njihove medsebojne odnose. Spozna in zna razlikovati bolezenska dogajanja pri različnih patogenetskih oblikah infekcijskih bolezni, (tako lokalnih, kot sistemskih). Seznani se s

Objectives:

Students learn about epidemiological, pathophysiological, etio-pathogenetic and clinical characteristics of infectious diseases, causative agent (pathogenic potential, virulence, etc.) and host (susceptibility, inclination, etc.) properties and their interrelations. They learn to distinguish between different pathogenetic forms of infectious diseases (local as well as systemic). They get acquainted with

posebnostmi anamneze in klinične preiskave pri infekcijskih boleznih, mikrobiološkim in serološkim dokazovanjem povzročiteljev, osnovami racionalne uporabe antibiotikov, kemo- in imunoprofilakse ter z aktualnim epidemiološkim stanjem infekcijskih bolezni pri nas in v svetu. Tako razume bolezenska dogajanja in je sposoben samostojno ocenjevati načine preprečevanja in zdravljenja teh bolezni.

specificity of anamnesis and clinical examination in infectious diseases, microbiological and serological verification of causative agents, basics of rational use of antibiotics, chemo- and immunoprophylaxis, and with current epidemiological situation in the area of infectious diseases in the country and abroad. Thus, they understand pathological occurrences and are able to independently consider possible preventive measures and treatment of these diseases.

Predvideni študijski rezultati:

Znanje in razumevanje:

- prepoznavanje klinične slike
- uvajanje diagnostičnih preiskav
- diferencialno-diagnostična presoja
- zdravljenje bolezni

Prenesljive/ključne spretnosti in drugi atributi:

- poznavanje osnovnih higienskih principov
- obvladovanje antibiotične profilakse in zdravljenja

Metode poučevanja in učenja:

- predavanja z avdio-vizuelno podporo
- seminarji
- klinične vaje

Knowledge and Understanding:

- recognition of clinical picture
- implementation of diagnostic investigations
- differential-diagnostic evaluation
- treatment of diseases

Transferable/Key Skills and other attributes:

- knowledge of the basic principles of hygiene
- knowledge of antibiotic prophylaxis and treatment

Learning and teaching methods:

- lectures with audio-visual support
- seminars
- clinical work

Načini ocenjevanja:

Delež (v %) / Weight (in %)

Assessment:

- pisni izpit

100 %

- written examination
