Cilji:

Študentje se seznani s bio-psiho-socialnim modelom zdravja in bolezni. Spoznajo vlogo psiholoških dejavnikov pri ohranjanju in krepitevi zdravja, psihološke in psihosocialne dejavnike, ki vodijo k pojavu bolezni in vplivajo na potek njenega zdravljenja. Razvijajo zmožnost empatije, ustreznega sporazumevanja ter nudenja psihološke podpore kot tudi notranje pripravljenosti za bodočo profesionalno vlogo.

Objectives:

Students become familiar to bio-psychosocial model of health and illness. They learn about a role of psychological factors in maintaining and promoting health, as also about their meaning in the occurrence and course of the disease and functional disorders. They could develop capability of empathy, active listening, ability to provide psychological support in partner relationship with patient, as also required internal strength to maintain the doctor's role.

Predvideni študijski rezultati:

Intended learning outcomes:

Znanje in razumevanje:

Pomen in prednosti bio-psihosocialnega modela zdravja in bolezni, njegovo uporabnost za klinično prakso.

Knowledge and understanding:

The importance and usefulness of the bio-psychosocial model of health and illness, its implication for clinical practice.

Prenesljive/ključne spretnosti in drugi atributi:

Je priprava na ustrezen odnos in sporazumevanje zdravnik-bolnik, na dvig bolnikovega zaupanja in sodelovanja med zdravljenjem, za zagotavljanje osebne in poklicne integritete in zadovoljstva pri delu z bolniki.

Transferable/Key Skills and other attributes:

It shall prepare students to effective verbal and non-verbal communication in doctor-patient relationship, to obtain patient's trust and his/her adherence in a medical and other forms of treatment, and to maintain the own personal and professional integrity, and satisfaction at work with patients.

Metode poučevanja in učenja:

Learning and teaching methods:

Interaktivna predavanja
Aktivno skupinsko delo
Samostojno delo študentov.

Metode dela:

Razlaga
Razgovor
Obravnava študijskih primerov
Multimedijske predstavitve

*Interactive lectures,
Students' active role in work groups,
Individual student work;*

Methods:

*Explanation
Discussion
Case study
Audio-visual presentations*

Načini ocenjevanja:

Delež (v %) /
Weight (in %)

Assessment:

- seminarsko delo
- pisni izpit

20 %
80 %

- seminar work
- written exam

ŠTUDIJSKE OBVEZNOSTI ŠTUDENTOV:

- sledenje predstavljenim tematikam, predavanjem;
- aktivna udeležba na seminarskih urah in kliničnih vajah.

ACADEMIC OBLIGATIONS OF STUDENTS:

- following of presented themes, lectures;
- active participation in seminar hours and clinical practice

POGOJI ZA PRISTOP K POSAMEZNEMU PREVERJANJU ZNANJA:

- polna udeležba pri seminarskih urah in kliničnih vajah

REQUIREMENTS FOR ACCESS TO INDIVIDUAL KNOWLEDGE CHECKING:

- full participation in seminar hours and clinical practice
- completed case studies, shorter integrative,

- opravljene študije primerov, krajše integrativne, problemske naloge, igranje vlog, itd.		problem tasks, role-plays, etc.
