Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites:

Vsebina:

Študenta seznamimo z osnovnimi informacijami iz fizikalne medicine in rehabilitacije. S področja fizikalne medicine mu predstavimo oblike, in sicer kinezioterapijo, elektroterapijo, mehanoterapijo, hidroterapijo, magnetoterapijo, lasersko terapijo. Dobi osnovne informacije iz področja balneologije in klimatologije - izkorisčanje klimatskih pogojev v terapevtske namene. Osnovni programi fizikalne terapije za posamezne bolezni (travmatologija, ortopedija, nevrologija).

Rehabilitacija: osnovni pojmi razdelitve rehabilitacije na medicinsko, profesionalno in socialno, definicija prizadetosti, oviranosti in okvare.

Ocena delazmožnosti, ocena invalidnosti,

Content (Syllabus outline):

The student will receive the basic information on physical medicine and rehabilitation. In the field of physical medicine different types will be presented: kinesiology, electric therapy, mechanic therapy, hydrotherapy, magnetic therapy and laser therapy. Moreover, some basic knowledge in the field of balneology and climatology- using the climatologic and environmental factors for therapeutic reasons. A basic program of physical therapy for certain diseases will be presented (traumatology, orthopedics, neurology).

REHABILITATION: basic information on rehabilitation (medical, professional and social; definition of disability, handicap, impairment).

The assessment of working ability, assessment of handicap and professional consulting as well

poklicno svetovanje, ergonomski pristopi. Tehnični pripomočki in pomagala - klasifikacija, nomenklatura, standardi. Protetika in ortotika: rehabilitacija amputiranih, rehabilitacija v otroški dobi. Gerontološka rehabilitacija: posebnosti fizikalne medicine in rehabilitacije pri starostnikih.

as ergonomic approach.
Medical aids and devices - classification, standards, definitions.
Prosthetics and orthotic: rehabilitation of amputated persons, rehabilitation of children.
Gerontologic rehabilitation: specific rehabilitation of elderly people.

Cilji:

Prikazati študentu osnovne informacije stroke Medicinka rehabilitacija kot neposredni del timskega zdravljenja. Informirati ga o metodah fizikalne terapije kot terapevtski program za posamezne bolezni in poškodbe. Seznaniti o možnostih specialista fizikalne medicine na primarni, sekundarni in tertiarni ravni. Osnovno informacijo o diagnostiki v fizikalni medicini (EMNG, UZ, termovizija).

Objectives:

Presentation of the basic professional information about the Medical rehabilitation as a direct part of integrated healing. Aim of the course is to inform the student about the methods of physical therapy, therapeutic program for certain diseases and injuries. Moreover, possibilities of physical medicine on the primary, secondary and tertiary level will be presented as well as basic information of diagnostics in physical medicine (Ultrasound, thermovision, EM)

Predvideni študijski rezultati:

Intended learning outcomes:

Znanje in razumevanje:
Poznavanje strokovnega področja rehabilitacije. Praktično znanje fiziatričnega kliničnega pregleda in poznavanje najpogostejših patoloških stanj, ki potrebujejo rehabilitacijsko obravnavo.

Knowledge and Understanding of rehabilitation. Practical knowledge on psychiatric clinical examination and most often pathologic conditions in need of rehabilitation treatment.

<p>Prenesljive ključne spretnosti in drugi atributi: Spretnost v prepoznavanju poglavitnih funkcionalnih motenj, ki jih rehabilitacija lahko izboljša. Razumevanje poteka in vloge rehabilitacije v vrnilvi bolnika/poškodovanca v normalno življenje. Poznavanje vloge posameznega člena rehabilitacijskega tima in tako ustrezno usmerjanje obravnave bolnika na primarnem nivoju. Poznavanje tehničnih možnosti za nadomeščanje prizadetih funkcij.</p>	<p>Transferable/Key Skills and other attributes: Recognition of main functional disorders, which could be improved by rehabilitation. Understanding of the course and role of the rehabilitation in patient's returning into normal life. Recognition of the role of each member of the team in patient treatment on primary level. Knowledge about technical possibilities of replacement of affected functions.</p>	
<p>Metode poučevanja in učenja:</p>		
<p>Predavanja, vaje, video prezentacija, klinične demonstracije.</p>	<p>Lectures, exercises, video presentations, clinical demonstrations</p>	
<p>Načini ocenjevanja: Način (pisni izpit, ustno izpraševanje, naloge, projekt) Pisni izpit ustni izpit.</p>	<p>Delež (v %) / Weight (in %) Assessment: Type (examination, oral, coursework, project): Written exam oral exam</p>	
<p>Način (pisni izpit, ustno izpraševanje, naloge, projekt)</p>	<p>50%</p>	<p>Type (examination, oral, coursework, project): Written exam</p>
<p>Pisni izpit</p>	<p>50 %</p>	<p>oral exam</p>
