

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Ime predmeta:	Izbrane vsebine in novosti pri javnem zdravju
Course title:	Selected topics and novelties in public health

Študijski program in stopnja Study programme and cycle	Študijska smer Study option	Letnik Year of study	Semester Semester
Splošna medicina, enovit magistrski študijski program		Peti, šesti	10., 11.
General medicine, Uniform master's degree study program		Fifth, sixth	10th, 11th

Vrsta predmeta (obvezni ali izbirni) / Course type (compulsory or elective)	izbirni elective
--	---------------------

Univerzitetna koda predmeta / University course code:	
--	--

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Clinical training	Druge oblike študija Other forms of study	Samost. delo Individual work	ECTS
5	40	AV LV RV			45	3

Nosilec predmeta / Course coordinator:	prof. dr. Ivan Eržen
---	----------------------

Jeziki /Languages:	Predavanja / Lectures: slovenski/slovene
	Vaje / Tutorial: slovenski/slovene

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites for enrolling in the course or for performing study obligations:

Vsebina (kratek pregled učnega načrta):	Content (syllabus outline):
--	------------------------------------

V okviru predmeta IZBRANE VSEBINE IN NOVOSTI PRI JAVNEM ZDRAVJU bodo predstavljeni dejavniki tveganja za zdravje v družbenem okolju. Spoznali bodo načine spremeljanja kazalnikov razmer v naravnem in socialnem okolju Poudarek bo na spoznavanju vloge za javno zdravje najpomembnejših ustanov v državi (IVZ, ZZZS, ZZV...) in Ministrstva za zdravje. Seznanili se bodo z programi promocije zdravja (CINDI, Zdrava mesta, Zdrave šole). Obravnava velikih javnozdravstvenih problemov (VJZ): Razširjenost VJZ v Sloveniji in primerjava z razširjenostjo v svetu Umrljivost v Sloveniji zaradi VJZ in primerjava z umrljivostjo v svetu Ekonomsko breme VJZ v Sloveniji v primerjavi z ekonomskim bremenom ostalih velikih javnozdravstvenih problemov Razširjenost dejavnikov za nastanek VJZ Javnozdravstveni ukrepi za obvladovanje VJZ: možnosti javnozdravstvenega ukrepanja, obvladovanje VJZ v Sloveniji in njegova učinkovitost	During the course PUBLIC HEALTH 2 Socio-economic determinants of health will be presented. Students will recognize the importance of lifestyle for health preservation. They will get to know the importance of indicators about physical and social environment and health. The role of most important PH institution in the country (National PH Institute, Regional PH Institutes, National Health Insurance Institute) and Ministry of Health will be presented. The health promotion programmes in the country (CINDI, Healthy cities, Healthy settings: schools, kindergartens, hospitals...) will be presented. Presentation of major PH problems (MPH) in Slovenia and comparison with prevalence/incidence in other countries MPH specific mortality in Slovenia and comparison with mortality in other countries Economic burden of MPH in Slovenia and comparison with economic burden of other major PH problems in Slovenia and in other countries Burden of risk factors for MPH in Slovenia and comparison with the situation in other countries PH measures for controlling MPH: possibilities, PH measures already applied in Slovenia and their effectiveness

Temeljni literatura in viri / Reading materials:

ZALETEL-KRAGELJ, Lijana, ERŽEN, Ivan, PREMIK, Marjan. Uvod v javno zdravje. 1. ponatis. Ljubljana: Medicinska fakulteta, Katedra za javno zdravje, 2011. XVI, 407 str

Cilji in kompetence:

Namen predmeta je študentom in študentkam prikazati področja dela javnega zdravja ter organiziranost in metode dela. Najpomembnejši cilj je sinteza/integracija predhodnega znanja vsebin javnega zdravja s prenosom v prakso. Spoznali bodo najsodobnejše pristope na področju JZ s posebnim poudarkom na mednarodnih aktivnostih. Zelo pomemben cilj je sinteza/integracija vsebin javnega zdravja z vsebinami klinične medicine na področju obvladovanja velikih javnozdravstvenih problemov.

Objectives and competences:

Basic objective is to present to the students main working methods and organizational approaches in public health. The most important objective is integration of PH topics/knowledge from the previous study year in PH practice. Special emphasis will be given to the concurrent international efforts in this field. One of the most important objectives is integration of PH approaches of protection of population health with clinical approaches in the field of major PH problems.

Predvideni študijski rezultati:

Znanje in razumevanje:
Študentke in študenti bodo:
razumeli pomen sinteze okoljskomedicinskih, socialnomedicinskih in epidemioloških konceptov populacijskega pristopa k obvladovanju

Intended learning outcomes:

Knowledge and Understanding:
On the completion of this course the student will:
understand the meaning and importance of integration of public health concepts and approaches, especially those of social medicine, environmental

<p>zdravstvenih problemov prebivalstva razumeli pomen povezovanja javnega zdravja s kliničnimi koncepti pristopa k obvladovanju zdravstvenih problemov prebivalstva, ki temelji na pristopu k posameznikom z visokim tveganjem. razumeli, da je javno zdravje skupek aktivnosti s cilji zmanjšati breme bolezni, prezgodnje umrljivosti ter trajnih okvar ali nezmožnosti, pogojenih z boleznimi, v celotnem prebivalstvu, poznali in razumeli glavne probleme na področju javnega zdravja, pristope za zmanjševanje javno zdravstvenih problemov ter poznali glavne težave in ovire, ki v zvezi s tem nastajajo, razumeli možnosti in omejitve javnega zdravja.</p> <p>Prenosljive/ključne spremnosti in drugi atributi: Študentke in študenti bodo:</p> <p>znanje, ki ga pridobijo pri tem predmetu, uporabili pri povezovanju znanj, ki so jih pridobili pri ostalih predmetih.</p> <p>razumeli pomena različnih pristopov k varovanju zdravja prebivalstva in kritično ovrednotenje multidisciplinarnosti in multisektorskega pristopa k reševanju zdravstvenih problemov.</p> <p>s pridobljenim znanjem in veščinami lahko sodelovali pri ugotavljanju razširjenost zdravstvenih problemov in stanj, povezanih z stilom življenja negativnimi družbenimi razmerami ter pri proučevanju vzroke zanje, iskanju ukrepov za obvladovanje posledic ter pri ocenjevanju učinkovitost teh ukrepov,</p> <p>razumeli elemente, ki so potrebni pri razvoju politike ter oblikovanju ustrezne strategije za uresničevanje ciljev in zvezki z izboljšanjem zdravja in blagostanja prebivalcev, razumeli prednosti in težave, ki so povezane z medsekterskim sodelovanjem.</p>	<p>medicine and epidemiology, in population approach to protecting health of the population and will know and understand main public health problems, effective measures for reducing those problems and obstacles that hinder more effective work, student will be able to define integrate PH knowledge with clinical knowledge.</p> <p>understand the meaning and importance of integration of PH approaches (population approaches) with clinical approaches (approaches to high risk individuals) in protecting the health of the population.</p> <p>will be aware of possibilities and limitation of public health.</p> <p>Transferable/Key Skills and other attributes:</p> <p>The students will:</p> <p>be able to apply the knowledge to all medical fields.</p> <p>understand the importance of different approaches in providing health to the population and critical evaluation of multidisciplinair and multisectorial approach for solving population health problems.</p> <p>be able to take an active part in assessment of health status of population with special emphasis on prevalence of different social, economical and behavioral factors that have significant influence on health status,</p> <p>understand how to develop policy, strategy development and strategic qualities to improve health and well being,</p> <p>will understand possibilities that arise with introduction of multisectoral cooperation but also difficulties that accompanies this approach.</p>
