

OPIS PREDMETA / SUBJECT SPECIFICATION

Predmet:	REOLOGIJA V BIOLOŠKIH SISTEMIH
Subject Title:	RHEOLOGY OF BIOLOGICAL SYSTEMS

Študijski program Study programme	Študijska smer Study field	Letnik Year	Semester Semester
BIOMEDICNSKA TEHNOLOGIJA BIOMEDICAL TECHNOLOGY		2	3 ali 4

Univerzitetna koda predmeta / University subject code:

Predavanja Lectures	Seminar Seminar	Sem. vaje Tutorial	Lab. vaje Lab. work	Teren. vaje Field work	Samost. delo Individ. work	ECTS
15	20		10		105	5

Nosilec predmeta / Lecturer:

Prof. Dr. Volker Ribitsch

Jeziki / Predavanja / Lecture: English
Languages: Vaje / Tutorial: English

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:
Prerequisites:

Kandidat mora doseči 300 ECTS na predhodnem študiju.	Graduate degree 300 ECTS
--	--------------------------

Vsebina:

- Koncepti reologije
- Deformacije trdnih materialov
- Stacionarni eksperimenti v reologiji (stacionarni strig, lezenje, relaksacija)
- Oscilatorni eksperimenti v reologiji (odvisnost od frekvence in deformacije)
- Stiskanje, vlečenje in torzija trdnin
- Reološki modeli in osnovne enačbe
- Reologija krvi in rdečih krvnih celic
- Reologija sluzi
- Deformacije tkiva in hrustanca
- Deformacije kosti in zob

Contents (Syllabus outline):

- Principles of rheology
- Rheology of particle solutions and network solutions
- Deformation of solid materials
- Stationary rheological experiments (stationary shear, creep, relaxation)
- Oscillatory rheological experiments (frequency and deformation dependence)
- Compression, elongation and torsion of solids
- Rheological models and constitutive equations
- Rheology of blood and red blood cells
- Rheology of mucus
- Deformation of tissue and cartilage
- Deformation of bones, teeth

Cilji:

Procesi deformacije.
Principi in metode reologije
Reološke lastnosti bioloških sistemov
Zvezo med strukturo in deformacijo
Razlogi za funkcijo samca v bioloških sistemih

Predvideni študijski rezultati:

Znanje in razumevanje:
Vedenje o deformacijah v bioloških sistemih pod naravnimi bremeni in aktivnostmi
Razumevanje mehanskih lastnosti in možne funkcije samca.

Prenesljive/ključne spretnosti in drugi atributi:
Študent osvoji znanje in razumevanje principov in metod reologije

Metode poučevanja in učenja:

Predavanja, individualno raziskovalno delo

Načini ocenjevanja:

Način (pisni izpit, ustno izpraševanje, naloge, projekt)
Ustno izpraševanje, seminarska naloga

Objectives:

- Deformation processes
- Rheological principles and methods
- Rheological properties of different biological system
- Developing a structure - deformation properties relationship
- Reasons of male-function of biological systems.

Intended learning outcomes:

Knowledge of the deformation behaviour of biological systems under natural loads and natural activities.
Understanding of mechanical properties and possible male-function.

Transferable/Key Skills and other attributes:
Student occupies knowledge and understanding of principles and of procedures rheology

Learning and teaching methods:

Lectures, independent research

Delež (v %) / Weight (in %)

Assessment:

Type (examination, oral, coursework, project):
Oral examination, report

Materialni pogoji za izvedbo predmeta :

Predavanja in individualno raziskovalno delo se bo izvajalo v obstoječih prostorih in na obstoječi opremi.

Material conditions for subject realization

The lectures and individual research work will take place in the existing facilities using existing equipment.

Obveznosti študentov:

(pisni, ustni izpit, naloge, projekti)
Ustni izpit, seminarska naloga

Students' commitments:

(written, oral examination, coursework, projects):
Oral final exam, report
