**Cilji in kompetence:**

- Umestitev zdravila v sistem zdravstvenega varstva, njegov pomen za populacijo in ciljne skupine ter njegov pomen za posameznika biopsiko-socialno-ekonomskem smislu.
- Spoznati osnove farmakoepidemiologije, ki jo definiramo kot aplikacijo epidemiološkega utemeljevanja, metod ter znanja za študij uporabe zdravil ter njihovih učinkov na človeški populaciji.
- Spoznati osnove farmakoekonomike, ki na osnovi ekonomskih, kliničnih in epidemioloških metod omogoča racionalizacijo zdravljenja z zdravili in je hkrati orodje, ki omogoča racionalizacijo sredstev v sistemu zdravstvenega varstva.

**Objectives and competences:**

- Positioning a medicine in the health care system and its importance for the population and target groups as well as its importance for the individual biopsychosocial-economic means.
- Basic knowledge of pharmacoepidemiology, which is defined as the application of epidemiologic reasoning, methods, and knowledge for the study of the use of drugs and their effects on the human population.
- Learning the basics of pharmacoeconomics that relies on the economic, clinical and epidemiological methods to rationalize drug treatment and is a tool that allows for efficient resource allocation in the health care system.

**Predvideni študijski rezultati:**
**Znanje in razumevanje:**

Študent osvoji znanje in razumevanje materije, potrebne za racionalno uporabo zdravil.

**Prenesljive/ključne spremnosti in drugi atributi:**

- Študent pridobi sposobnost izvajanja farmakoepidemioloških in farmakoekonomskih raziskav.

**Intended learning outcomes:**
**Knowledge and understanding:**

- Student wins knowledge and understanding of subject-matter, needed for rational usage of drugs

**Transferable/Key Skills and other attributes:**

- Student becomes master of performing pharmacoepidemiologic and pharmacoeconomic research.

**Metode poučevanja in učenja:**

Predavanja  
Seminarji  
Samostojno delo

**Learning and teaching methods:**

Lectures  
Seminars  
Individual work
