

UČNI NAČRT PREDMETA / COURSE SYLLABUS						
Ime predmeta:	Nutriceutiki in sodobni trendi v prehrani					
Course title:	Nutraceutics and New Trends in Nutrition					
Študijski program in stopnja Study programme and cycle	Študijska smer Study option			Letnik Year of study	Semester Semester	
Biomedicinska tehnologija/3. stopnja				2	3 ali 4	
Biomedical Technology/3rd Degree						
Vrsta predmeta (obvezni ali izbirni) / Course type (compulsory or elective)				Izbirni Elective		
Univerzitetna koda predmeta / University course code:						
Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Clinical training	Druge oblike študija Other forms of study	Samost. delo Individual work	ECTS
15	30	AV LV RV			135	6
Nosilec predmeta / Course coordinator:	Prof. dr. Dušanka Mičetić-Turk					
Jeziki /Languages:	Predavanja / Lectures: Slovenščina/Slovene Vaje / Tutorial:					
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites for enrolling in the course or for performing study obligations:					
Vsebina (kratki pregled učnega načrta):	Content (syllabus outline):					
Vrste prehrane: uravnotežena, varna, varovalna, priporočena, alternativna prehrana, klinična prehrana (enteralna in parenteralna). Nutriceutiki Vitamini Elementi v sledovih Deficitarna stanja Raziskave na področju prehrane Prehrana kot dejavnik tveganja pri nastanku bolezni. Dodatki v prehrani. Aditivi in kontaminanti hrane. Hranilne in energijske potrebe človeka. Ocena stanja prehrane in prehranjenosti prebivalcev (ocena prehranskega statusa). Planiranje prehrane v zdravju posebno ogroženih skupin prebivalcev. Prehrana in promocija zdravja.	Type of nutrition: balanced, safe, recommended, alternative nutrition, clinical nutrition (enteral and parenteral nutrition) Nutraceutics Vitamins Elements in traces Deficit status Research on the nutrition area Nutrition as risk factor at disease origin Nutrition additives Additives and contaminants in nutrition Nutrition and energy needs Nutrition state and nourishment evaluation (evaluation of nutrition status) Planning the nutrition of health threatened people Nutrition and health promotion Nutrition habits and bad habits					

Prehrambene navade in razvade ljudi. Prehrana postaja v sodobnem svetu vedno bolj pomembna veja znanosti, ker prodira med najbolj komplikirane mehanizme našega življenja in počutja. Pestra prehrana sodi v posebno obliko sodobne in zdrave prehrane, ker je pri taki prehrani tudi najmanj mogoče, da pride do pomanjkanja posameznih živiljenjsko pomembnih hrani.	In modern world the nutrition is becoming very important branch of sciences. It penetrates in most complicated mechanisms of our lives. Variety of nutrition is a special part of kind of modern and healthy nutrition, because with this kind of nutrition lack of life important substance is not possible.
Nutraceutiki kot izjemno pomembne komponente hrane imajo vlogo v vseh presnovnih mehanizmih tako v zdravju kot tudi v bolezni.	Nutraceutics as extremely important food components play a role in all metabolic mechanisms both in health and disease.

Cilji in kompetence:	Objectives and competences:
Poznavanje pomena nutraceutikov v prehrani in njihove vloge v medicini. Študent zna definirati in klasificirati posamezne nutraceutike ter opredeliti njihovo vlogo v presnovi in antioksidantni zaščiti organizma. Študent zna svetovati posamezne prehranske suplemente glede na posamezne indikacije in potrebe.	Understanding the importance of nutraceuticals in medicine and their role in medicine. The student can define and classify individual nutraceutics and define their role in metabolism and antioxidant protection of the organism. The student can advise individual dietary supplements according to individual indications and needs.
Predvideni študijski rezultati:	Intended learning outcomes:
Znanje in razumevanje:	Knowledge and understanding:
Vpliv in učinek hrane na človekovo zdravje in bolezen.	Food influence and effect to human health and human disease.
Prenosljive/ključne spremnosti in drugi atributi:	Transferable/key competences and other abilities:
Cilj predmeta je pridobiti vpogled v nutraceutike, funkcionalno hrano in prehranska dopolnila in razumeti njihov način delovanja. Znati indikacije za njihovo uporabo in delovanje ter učinke na zdravje. Znati svetovati posamezna prehranska dopolnila za preprečevanje in njihovo uporabo pri zdravljenju različnih bolezni.	The aim of the subject is to gain an insight into nutraceuticals, functional foods and nutritional supplements and understand their way of action. To know the indications for their use and performance and effects on health. To know which supplements to advise as individual dietary supplements for prevention and treatment in various diseases.

Metode poučevanja in učenja:	Learning and teaching methods:	
Predavanja Seminarji Samostojno delo	Lectures Seminars Individual work	
Načini ocenjevanja:	Delež (v %) / Share (in %)	Assessment methods:
Način (pisni izpit, ustno izpraševanje, naloge, projekt)		Method (written or oral exam, coursework, project):
Pisni izpit	30 %	Written examination
Ustno izpraševanje	40 %	Oral examination
Seminarske naloge	30 %	Seminary work
