

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	Klinična patofiziologija nujnih stanj
Course title:	Clinical Pathophysiology of Emergencies

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Biomedicinska tehnologija/Biomedical Technology 3. stopnja/3rd Degree		2	3 ali 4

Vrsta predmeta / Course type	Izbirni/Elective
-------------------------------------	------------------

Univerzitetna koda predmeta / University course code:	
--	--

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. Delo Individ. Work	ECTS
15	20	10			105	5

Nosilec predmeta / Lecturer:	Izr. prof. dr. Dušan MEKIŠ
-------------------------------------	----------------------------

Jeziki / Languages:	Predavanja / Lectures: Slovenščina, angleščina/ slovene, english
	Vaje / Tutorial: Slovenščina, angleščina/ slovene, english

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:
--	-----------------------

Kandidat mora doseči 300 ECTS na predhodnem študiju.	Graduate degree 300 ECTS
--	--------------------------

Vsebina:	Content (Syllabus outline):
Predmet obravnava fiziologijo in pojasnjuje patofiziologijo nekaterih nujnih stanj, znamenj in simptomov z prikazom primernih kliničnih testov in oskrbo. Pričakovani simptomi in znamenja so predstavljena s specifičnim patofiziološkim procesom.	The subject reviews normal physiology and explains the pathophysiology underlying emergency disease, signs and symptoms, and selection of tests and treatments. Expected signs and symptoms are related to the specific pathophysiologic processes occurring.

Predmet je razdeljen v štiri dela: 1.osnovna načela patofizioloških procesov 2.patofiziologija srčno-žilnega sistema d patofiziologijo i n oskrbo poškodbe miokarda pri oživljanju in patofiziologija šoka 3.klinična patofiziologija akutnega respiratornega popuščanja in kapnografije 4.patofiziologija hude poškodbe možganov	The subject is divided in four parts: 1. basic principles of pathophysiology 2. cardiovascular pathophysiology with pathophysiology and management of myocardial injury during cardiopulmonary resuscitation and pathophysiology of shock 3. clinical pathophysiology of acute respiratory insufficiency and capnography 4. pathophysiology of severe brain injury

- Najnovejši prispevki iz Circulation, Resuscitation, Shock, Chest, Intensive Medicine Care, Critical Care, Critical Care Medicine

Cilji in kompetence:

Znanje osnovnih patofizioloških načel nujnih stanj in sodobnih informacij o novih možnostih oskrbe takšnih stanj. Klinična aplikacija algoritmov (načelo opazovanja in odločanja).

Objectives and competences:

Knowledge of basic principal of patophysiology of some emergencies and up-to-date information about new options for management of emergencies.
Application of the philosophy of the algorithms (alternating observation and decision steps).

Predvideni študijski rezultati:
Intended learning outcomes:
Znanje in razumevanje:

Razumevanje in aplikacija algoritmov kardiopulmonalnega oživljjanja. Razumevanje strategije minimaliziranja poškodb po oživljjanju povezanih z uporabo trenutno veljavnih tehnik in seznanjanje z novimi terapevtskimi pristopi za preprečevanje omenjenih poškodb. Znanje monitoringa kritično bolnega bolnika, posebej kapnografije in EKG-a.

Knowledge and understanding:

Understanding and application the algorithms in CPR. Understanding the strategies for minimizing post resuscitation injury associated with current resuscitation techniques and examine novel therapies aimed at minimizing ischemia and reperfusion injury. Knowledge of monitoring critically ill patients, especially capnography and ECG.

Prenesljive/ključne spremnosti in drugi atributi:

Monitoring, tehnike proste venske poti, endotrahealna intubacija, kapnografija, odčitavanje EKG-a, uporaba medikamentov v urgentnih situacijah (volumna resuscitacija, inotropi, vazoaktivna terapija) hitra sekvenčna intubacija, sinhronizirana kardioverzija in zunanja elektrostimulacija). Reševanje scenarije po načelu PBL (problem basic learning)

Transferable/Key Skills and other attributes:

Monitoring, intravenous access, endotracheal intubation, capnography, electrocardiography and cardiac monitoring, drugs in emergencies (volume resuscitations, inotropes, vasopressors), rapid sequence intubation, synchronised cardioversion, cardiac pacing. PBL scenarios.

Metode poučevanja in učenja:
Learning and teaching methods:

Predavanja, vaje v Simulacijskem centru, samostojno projektno seminarsko delo izbranih poglavij, PBL, ogled in delo na instrumentih.

Lectures, laboratory work in Centre of simulation, project seminar, PBL, observation and work with instruments

Načini ocenjevanja:
Delež (v %) /
Weight (in %)
Assessment:

- projektna seminarska naloga z javno predstavljavo in
- ustni izpit.

- Project seminar – coursework with public demonstration,
- oral examination
