<b>Vsebina:</b>  Vsebina študijskega predmeta »Izbrana poglavja iz urgentne medicine« zajema proučevanje novih metodologij za diagnostiko, spremljanje in zdravljenje najpogostejših patoloških stanj v urgentni medicini. Študij bo predstavljal povezavo med kliničnim delom, kliničnim znanstvenim raziskovanjem ter novimi spoznanji sodobnih diagnostičnih preiskav in zdravljenja. Poudarek bo predvsem na naslednjih področjih urgentne medicine: <ul style="list-style-type: none"><li>• dispečerski sistem</li><li>• oživljvanje (reanimacija)</li><li>• srčno žilne bolezni</li><li>• bolezni pljuč</li><li>• bolezni centralnega živčnega sistema</li><li>• akutni abdomen</li><li>• poškodbe</li><li>• sepsa</li></ul>	<b>Content (Syllabus outline):</b>  The contents of the study programme »Chosen chapters from emergency medicine« comprise the studying of new methodologies for diagnosis, evaluation and monitoring of treatment of most common disease entities in/from the field of emergency medicine. The study will represent a connection between clinical work, clinical scientific research and new knowledge acquired by modern diagnostic investigation and treatment. The stress will be above all on the following fields of emergency medicine: <ul style="list-style-type: none"><li>• dispatch system</li><li>• resuscitation</li><li>• cardio vascular diseases</li><li>• lung diseases</li><li>• central nervous system diseases</li><li>• acute abdomen</li><li>• trauma</li><li>• sepsis</li></ul>
---	---

**Cilji in kompetence:**

Namen predmeta »Izbrana poglavja v urgentni medicini« je pridobiti širše znanje in razumevanje patofiziologije iz posameznih področij urgente medicine. Poudarek je na kliničnih stanjih, ki so v urgentni medicini najpogostejsa in vplivajo na obolenost in umrljivost prebivalstva. Zato je cilj uvajanje novih ter izboljševanje obstoječih diagnostičnih ter terapevtskih postopkov ter njihov prenos v vsakdanjo klinično prakso.

**Objectives and competences:**

The objective of the study »Chosen chapters from emergency medicine« is to acquire knowledge and comprehension of pathophysiology from specific fields of emergency medicine. The stress will be on the pathologic conditions most common in emergency medicine and highly affecting the morbidity and mortality of the population. Therefore, the objective will be the introduction of new and improvement of contemporary diagnostic and therapeutic procedures and their transfer into everyday clinical practice.

**Predvideni študijski rezultati:**

**Znanje in razumevanje:**

Osvojitev novih znanj s posameznih področij urgente medicine in njihovo razumevanje, ki jih bo mogoče neposredno koristiti v procesu zdravljenja in spremljanja bolezni.

**Prenesljive/ključne spremnosti in drugi atributi:**

Odvisno od raziskovalnega področja in samega raziskovalnega projekta.

**Metode poučevanja in učenja:**

Predavanja, seminarji, seminarske vaje, samostojno raziskovalno delo.

**Knowledge and understanding:**

Acquired new knowledge from specific fields in emergency medicine, which can be applied directly in the processes of treatment and monitoring of critically ill patients.

**Transferable/Key Skills and other attributes:**

Depends on the research field and on the research project.

**Learning and teaching methods:**

Lectures, seminars, tutorials, independent research work.

**Načini ocenjevanja:**

**Delež (v %) /**
