

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	Napredna interdisciplinarna analitika v biomedicini
Course title:	Advanced Multidisciplinary Analytics in Biomedicine

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Biomedicinska tehnologija/Biomedical Technology 3. stopnja/3rd Degree		2	3 ali 4

Vrsta predmeta / Course type	Izbirni/Elective
-------------------------------------	------------------

Univerzitetna koda predmeta / University course code:	
--	--

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klin. vaje work	Druge oblike študija	Samost. Delo Individ. Work	ECTS
15	20	10	0		105	5

Nosilec predmeta / Lecturer:	doc. dr. Uroš Maver doc. dr. Matjaž Finšgar
-------------------------------------	--

Jeziki / Languages:	Predavanja / Lectures: Slovenski / Slovene Vaje / Tutorial: Slovenski / Slovene
--------------------------------	--

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti: Pogoji za vključitev v delo: Osnovna znanja iz kemije, biokemije, kemijskega inženirstva in biomedicinske tehnologije (kombinacija fiziologije, farmacije, farmakologije, celične biologije itd.). Pogoji za opravljanje študijskih obveznosti: Vsaka izmed naštetih obveznosti mora biti opravljena s pozitivno oceno. Pozitivna ocena iz seminarjev je pogoj za pristop k izpitu..	Prerequisites: Prerequisites for attending the course: Basic knowledge of chemistry, biochemistry, chemical engineering and biomedical technology (combination of physiology, pharmacy, pharmacology, cell biology, etc.). Prerequisites for completing the course: Each of the mentioned commitments must be assessed with a passing grade. Passing grade for the seminars is required for attending the final exam.

Vsebina:	Content (Syllabus outline):
1. Uvod <ul style="list-style-type: none"> • Razvoj sodobnih metod v biomedicini <ul style="list-style-type: none"> a. Biodiagnostika b. Biomateriali c. Multimodalno zdravljenje in teranostika 2. Posebne tehnike <ul style="list-style-type: none"> • tehnika fotoelektronske spektroskopije • različne tehnike elektronske spektroskopije • tehnika masne spektrometrije sekundarnih ionov • mikroskopija na atomsko silo • vrstična tunelska mikroskopija • vrstična elektronska spektroskopija • tehnika elipsometrije • Ramanska in IR-spektroskopija • spektrometrija lasersko vzbujene plazme • tehnika GD OES • 3D-profilometrija 	1. Introduction <ul style="list-style-type: none"> • Development of novel methods in biomedicine <ul style="list-style-type: none"> a. Biodiagnostics b. Biomaterials c. Multimodal treatment and theranostics 2. Advanced techniques: <ul style="list-style-type: none"> • X-ray photoelectron spectroscopy • different electron spectroscopy techniques • secondary ion mass spectrometry • atomic force microscopy (AFM) • scanning electron spectroscopy (SEM) • scanning tunnelling microscopy (TEM) • ellipsometry • Raman and IR spectroscopy • laser-induced breakdown spectroscopy (LIBS) • GD-OES • 3D-profilometry • confocal microscopy

<ul style="list-style-type: none"> konfokalna mikroskopija analiza stičnega kota pretočna citometrija 3D-tisk <p>3. In vitro testiranje (posebni primeri)</p> <ul style="list-style-type: none"> Funkcionalni celični testi in razvoj celičnih modelov/testov – razvoj modelov bolezni Funkcionalno testiranje v simuliranem fiziološkem okolju (npr. korozija za ortopediske pripomočke) Razvoj ogrodij za tkivno inženirstvo 	<ul style="list-style-type: none"> contact angle analysis flow cytometry 3D-printing <p>3. In vitro testing (special examples)</p> <ul style="list-style-type: none"> Functional cell testing and development of cell models/assays – development of disease models Functional testing in simulated physiological environments (e.g. corrosion of orthopaedic implants...) Scaffold development for tissue engineering

Temeljni literatura in viri / Readings:

- D. A. Skoog, F. J. Holler, S. R. Crouch, Principles of Instrumental Analysis, 6. izdaja, Thomson Brooks/Cole, 2007.

Tekoča periodika:

- Journal of Pharmaceutical and Biomedical Analysis (<https://www.journals.elsevier.com/journal-of-pharmaceutical-and-biomedical-analysis/>)
- Trends in Analytical Chemistry (<https://www.journals.elsevier.com/trends-in-analytical-chemistry/>)
- Biosensors and Bioelectronics (<https://www.journals.elsevier.com/biosensors-and-bioelectronics>)

Cilji in kompetence:

- spoznati osnove razvoja novih metod v biomedicini
- testiranje materialov s sodobnimi tehnikami
- interpretacija rezultatov
- simuliranje pogojev med uporabo biomedicinskih pripomočkov in priprava funkcionalnih testov
- spoznati principe in omejitve instrumentalne analize v medicini

Objectives and competences:

- learn the basics of new method development in biomedicine
- testing materials with modern techniques
- correct interpretation of results
- simulate the conditions of use of biomedical devices and preparation of functional tests
- Recognition of basic principles and limits of instrumental analysis in medicine

Predvideni študijski rezultati:
Intended learning outcomes:
Znanje in razumevanje:

- pravilna izbira analiznih metod in postopkov glede na vrsto vzorca

Knowledge and understanding:

- selection of appropriate analytical methods based on the sample type

Prenesljive/ključne spremnosti in drugi atributi:

- Predmet se dopolnjuje s predmeti, ki vsebujejo kemijske vsebine, vsebine v povezavi s celično biologijo, fiziologijo, farmakologijo in farmacijo.

Transferable/Key Skills and other attributes:

- The subject is related to the chemistry courses, cell biology, physiology, pharmacology and pharmacy.

Metode poučevanja in učenja:
Learning and teaching methods:

Interaktivna predavanja

Interactive frontal method

Seminarji

Seminars

Vaje

Lab work

Načini ocenjevanja:
Weight (in %) / Assessment:

Seminar	50%	Seminar
Izpit	50%	Examination
