

UČNI NAČRT PREDMETA / COURSE SYLLABUS								
Ime predmeta:	Farmacevtska biotehnologija							
Course title:	Pharmaceutical Biotechnology							
Študijski program in stopnja Study programme and cycle	Študijska smer Study option				Letnik Year of study	Semester Semester		
Biomedicinska tehnologija/3. stopnja					1	1 ali 2		
Biomedical Technology/3rd Degree								
Vrsta predmeta (obvezni ali izbirni) / Course type (compulsory or elective)					Temeljni Basic			
Univerzitetna koda predmeta / University course code:								
Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Clinical training	Druge oblike študija Other forms of study	Samost. delo Individual work	ECTS		
20	40	15			195		9	
		AV					LV	RV
Nosilec predmeta / Course coordinator:	Izr. prof. dr. Uroš Maver Prof. dr. Uroš Potočnik							
Jeziki /Languages:	Predavanja / Lectures:		Slovenski /Slovene					
	Vaje / Tutorial:		Slovenski /Slovene					
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites for enrolling in the course or for performing study obligations:							
Vsebina (kratek pregled učnega načrta):	Content (syllabus outline):							
LADME sistem (predklinična obravnava zdravilnih učinkovin) Biomedicinsko inženirstvo Osnove biomedicinske analitike In vitro testiranje varnosti in učinkovitosti zdravilnih učinkovin in medicinskih pripomočkov Tehnologija rekombinantne DNA Najpomembnejši rekombinantni biofarmacevtiki Priprava in uporaba monoklonskih protiteles Gensko zdravljenje rakavih in ostalih obolenj Sistemi vnosa genov v organizem	LADME system (preclinical drug evaluation) Biomedical Engineering Basic biomedical analytics In vitro testing of the safety and efficacy of drugs and medical devices Recombinant DNA technology The most important recombinant biopharmaceuticals Preparation and use of monoclonal antibodies Gene therapy of cancer and other diseases Introduction to gene delivery into the body

Cilji in kompetence:	Objectives and competences:
Pridobiti znanja molekularne biologije, molekularne genetike in predvsem razumevanje novih načinov terapij in tarč, ki izhajajo iz spoznavanja človeškega genoma. Spoznavanje najpomembnejših kompleksnih zdravilnih učinkov in področja biofarmacevtikov. Razširiti znanje s področja priprave novih zdravil in medicinskih pripomočkov, vključno s testiranjem njihove varnosti in učinkovitosti.	Acquire knowledge of molecular biology, molecular genetics and understanding of novel approaches to gene therapy derived from human genome sequencing. Getting to know the most important active substances in the field of biopharmaceuticals. Expand knowledge on the preparation of new drugs and medical devices, including testing their safety and efficacy.
Predvideni študijski rezultati:	Intended learning outcomes:
Znanje in razumevanje: Z razumevanjem sestave in delovanja biofarmacevtikov in uporabe genske terapije se poveča praktično znanje o biofarmacevtikih, glavnih terapevtskih učinkih in razumevanje nastajanja neželenih učinkov. S spoznavanjem novih pristopov k razvoju zdravil, medicinskih pripomočkov in njihovega testiranja, se povečajo možnosti za inovativno razmišljanje študentov v smeri razvoj novih terapevtskih pristopov.	Knowledge and understanding: By understanding the composition and functioning of biopharmaceuticals and the use of gene therapy to increase the practical knowledge of biopharmaceuticals main therapeutic effects and understanding the emergence of side effects. By learning new approaches of the development of medicines, medical devices and their testing to increase opportunities for innovative thinking in students towards the development of new therapeutic approaches.

Prenosljive/ključne spremnosti in drugi atributi: Iskanje podatkov po svetovnih bazah podatkov, aplikacija v praksu (iskanje primerov)	Transferable/key competences and other abilities: Knowledge of database searching, application into practical work (case studies)	
Metode poučevanja in učenja:		Learning and teaching methods:
Predavanja Seminarske naloge Vaje		Lectures Seminars Tutorial
Načini ocenjevanja:	Delež (v %) / Share (in %)	Assessment methods:
Način (pisni izpit, ustno izpraševanje, naloge, projekt)		Method (written or oral exam, coursework, project):
Pisni izpit Seminarska naloga (pisna in predstavitev)	60 % 40 %	Written examination Seminars (written and presented)
