# Presentation of Education and Medical Simulation Center in Katowice (Poland)

Aleksandra Dziubałtowska, Michal Karaszewski, Elzbieta Skorupska

# Where is Poland? Carbon Respective Pale Gorgan Respective Poland Respective Respective

# Center-Opened in November 2012

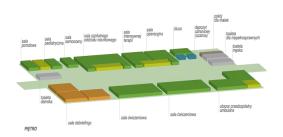

30 065 985 PLN = 7,5 mln € European Union (85% of cost) and Regional Development Found (15%)

### **AIMS**

- teaching students of medical, dental, pharmacy and biotechnology faculties
- improve practical skills, knowledge
- assess a medical situation and make quick decisions about treating
- team cooperation in stressful situations
- recognizing limitations
- learning interventions and guidelines in certain medical cases

- intra-faculty unit, used by four departments of the Silesian Medical University.
- 6 simulation rooms

ER

Pre-hospital emergencies with an ambulance simulator

Labour room

intensive care unit

paediatric room

operating room

- 7 adult patient simulators,
- · child simulator,
- · infant simulator
- · labour simulator with newborn baby simulator

### Simulation rooms are provided with:

- necessary medical equipment (e.g. anaesthetics devices, ventilators, defibrillators, patient monitors, laryngoscopes)
- audio-video systems for recording of simulation sessions.

# Debriefing rooms (3)

 participants of simulation can analyze what they have done.

### Practice rooms (2)

- students may train manual skills using a large number of less advanced manikins and models, like
- ALS/BLS
- · Intraosseus injections
- i.v. injections
- Spinal injections
- · Catherisation equipment
- · Coniotomy, intubation
- Pneumothorax decompression
- · Microsurgery equipment

- Besides simulation part there are also rooms equipped with infrastructure allowing for a comprehensive use of information and communication technologies in education multimedia rooms equipped with computers with stereoscopic 3D displays, two auditoria equipped with projectors.
- The multimedia library gives access to the internet and digital resources of the University. The Centre also provides e-learning platform and a video-conferencing system that enables live coverage from operating

# Thank you for your attention
