

## Simulation of accident - medical emergency response training

Agnieszka Rafalska  
Agata Szczurowska

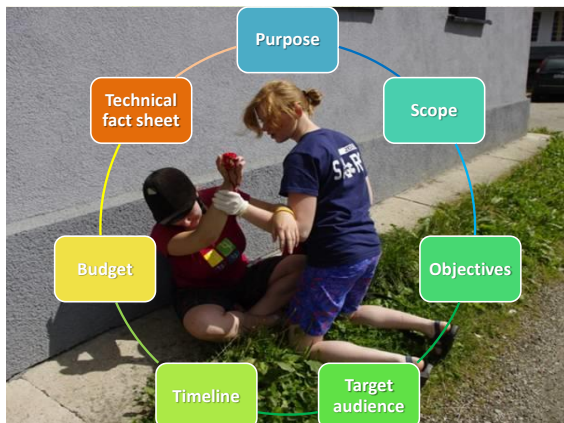

UNIWERSYTET MEDYCZNY  
IM. PIASTÓW ŚLĄSKICH WE WROCŁAWIU

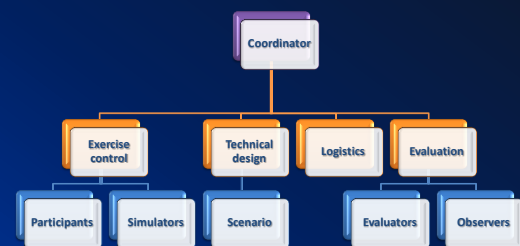

## Introduction

- Accidents - major cause of death
- Wide range of simulated situations
- Aims: perfecting skills in providing first aid and cooperation between emergency services, crisis management

## Elements of the simulation

## Emergency simulation - preparation

- Case synopsis
- Place, scenography
- Standardized patients or phantoms
- Equipment and supporting files
- Trainees
- Evaluation

## Emergency simulation - preparation

- Case synopsis
- Place, scenography
- Standardized patients or phantoms
- Equipment and supporting files
- Trainees
- Evaluation

## Emergency simulation - preparation

- Case synopsis
- Place, scenography

- Equipment and supporting files
- Trainees
- Evaluation

## Emergency simulation - preparation

- Case synopsis
- Place, scenography
- Standardized patients or phantoms
- Equipment and supporting files
- Trainees
- Evaluation

## „How to make a wound” training

### Emergency simulation - preparation

- Case synopsis
- Place, scenography
- Standardized patients or phantoms
- Equipment and supporting files
- Trainees
- Evaluation

Medical equipment  
Messages  
Maps, diagrams, response plan

### Emergency simulation - preparation

- Case synopsis
- Place, scenography
- Standardized patients or phantoms
- Equipment and supporting files
- Trainees
- Evaluation

Type of trainees  
Role of each participant

### Emergency simulation - preparation

- Case synopsis
- Place, scenography
- Standardized patients or phantoms
- Equipment and supporting files
- Trainees
- Evaluation

### Evaluation

Evaluating the performance of participants during the exercise

Evaluation of the organization of the simulation

## Euro 2012

- Over 200 000 football fans expected at one time
- Does our management in crisis work properly?

Simulations at main hospitals

## Simulation before EURO 2012
